For each of the member countries of the European Union, as well of some of their key trading partners, this guide provides systematic information on

the following subjects: the organization of the tax administration; the outline of the tax system; legal guidelines for tax auditing, accounting obligations and changing the atmosphere of audits; audit strategy, auditing policy and the audit process; international issues.

Principles of European Contract Law Fachmedien Recht und Wirtschaft International Law of the Shipmaster is a comprehensive review of the laws and regulations governing the shipmaster

including customary law, case law, statutory law, treaty law and regulatory law. "For the legal practitioner, this book is a unique and invaluable time saving survey of the law affecting the shipmaster across a range of jurisdictions worldwide, all logically set out in one convenient volume. Not only is this a unique source of reference for lawyers and the courts, as well as ship masters themselves, the insights it provides constitute an invaluable aid to decision making for ship managers

and operators, not to mention risk managers. The book's publication date is September 2009. No doubt it will be updated as the years pass. We believe it is destined to become a classic work in maritime and shipping law." An appreciation by Phillip Taylor MBE and Elizabeth Taylor of Richmond Green Chambers This book provides: • A brief history and survey of the international law affecting the shipmaster • Certification, nationality and taxation

requirements for the master in 179 jurisdictions

- Comparison of regimes of law of agency for shipmasters, crews across jurisdictions •

Examination of shipmaster duties and liabilities and penalties in all IMO member states

Der Band versammelt Beiträge, die anlässlich des 7. Seoul-Freiburger Rechtswissenschaftlichen Symposiums im September 2019 in Seoul gehalten wurden. Die

Zusammenarbeit und der akademische Austausch zwischen den juristischen Fakultäten der Seoul National University (SNU) und der Albert-Ludwigs-Universität Freiburg hat eine alte und wertvolle Tradition der engen Beziehungen zwischen dem koreanischen und dem deutschen Recht lebendig gehalten. Das 7. Symposium war dem Thema "Rechtstheorie und -auslegung in einer dynamischen Gesellschaft" gewidmet und deckte ein breites Spektrum an Themen ab,

die in sechs Sektionen unterteilt waren: I. Rechtstheorie und -auslegung, II. Unternehmensrecht, III. Internationales Privatrecht und Zivilprozessrecht, IV. Recht der künstlichen Intelligenz, Eigentumsrecht und Strafrecht. V. Vertragsrecht, und VI. das Verhältnis von supranationalem und innerstaatlichem Verfassungsrecht. Die meisten der auf dem Symposium gehaltenen Vorträge sind in diesem Band versammelt.

The effect of the significant changes in tax law at domestic, European, and international levels on investment funds, an important part of global financial services, creates a complex environment for practitioners and a source of debate for academics and policymakers. This is the

first book to provide a comprehensive legal and practical analysis of the changes to the complex multilevel tax and regulatory framework concerning different types of investment funds. The contributions, updated as of late 2017, were originally presented at a conference held at the University of Luxembourg in November 2016 under the auspices of the ATOZ Chair for European and International Taxation. The book covers the central questions arising in national law and tax

policy, explores the regulatory and tax framework of the European Union (EU), and discusses the multifaceted interactions of both national and EU law with bilateral tax treaties. Through fourteen chapters following a brief introduction, leading academic experts and practising specialists provide decisive insight into: - the regulatory regime for European investment funds; - the tax law and reforms in both Luxembourg and Germany; - the role of the

European Commission's State-aid practices; - examples of case law concerning the application of non-discrimination rules to various investment vehicles; - the impact of tax-specific EU legislation, such as the Parent-Subsidiary Directive, the Tax Merger Directive, and the Anti-Tax Avoidance Directive; - the availability of tax treaty protection for different collective and non-collective investment funds; - the impact of base erosion and profit shifting (BEPS)

developments on the taxation of cross-border investments; - the value-added tax (VAT) treatment of investment funds and their managers; and - the consequences of the global drive towards automatic exchange of information relating to existing cross-border investment structures. With its particular focus on Luxembourg - the leading centre for investment funds in Europe (and second only to the United States globally) and, thus, an instructive model for

domestic-level investment fund regulation and taxation - this volume reveals the common issues that arise in virtually every other jurisdiction with a sizeable fund industry. As the first in-depth treatment of the globally significant nexus between investment funds and taxation, the book will prove valuable to policymakers, practitioners, and academics in both financial services and tax law.

This book offers a practical presentation of the special features of data protection law in Luxembourg and the way it interacts with the General Data Protection Regulation (GDPR). The GDPR has been effective since 25 May 2018. It has been obligatory to comply with the new Luxembourg Data Protection Act in all data processing operations that relate to Luxembourg as a supplement to the GDPR since 20 August 2018. In

the first part of this book, you can learn what new legal requirements the GDPR and the new Luxembourg Data Protection Act impose on companies in Luxembourg and group structures with relationships to Luxembourg respectively. The second part contains a systematic presentation of the GDPR and the Luxembourg Data Protection Act. The book aims to help you to meet the requirements of data protection law in Luxembourg in everyday corporate life and

implement them in practice with as little expense and effort as possible. The book, which also includes the text of the Luxembourg Data Protection Act, is available in three languages: French, English and German. The German and English translations of the legal text have moreover been authorised by the supervisory authority in Luxembourg, the CNPD, so you can be sure that using the translations will not cause any disadvantage as compared with applying

the law in its original wording.

 The aim of each volume of this series Guides to Information Sources is to reduce the time which needs to be spent on

patient searching and to recommend the best starting point and sources most likely to yield the desired information. The criteria for selection provide a way into a subject to those new to the field and assists in identifying major new or possibly unexplored sources to those who already have some acquaintance with it. The series attempts to achieve evaluation through a careful selection of sources and through the comments provided on those sources.

Luxembourg Tax Guide - Strategic, Practical Information, Regulations
Martinus Nijhoff Publishers
This book provides an extensive and critical assessment of the current regulatory and supervisory framework of investment services in the European Union (EU) and proposes alternative institutional structures. Recent trends in financial services at EU level as well as regulatory and institutional developments at national level make the focus of this book very timely. The

book contributes to the debate by making specific suggestions with regard to the institutional structure and the operational sphere of a central pan-European regulator.
Europe Review Routledge
This volume offers proposed Articles, followed by comments and information. Topics include: plurality of debtors and creditors, assignment, substitution of new debtor and transfer of contract, set-off, prescription, illegality, and conditions and

capitalisation of interest.

Insider Dealing and Criminal Law Springer

This work is a multidisciplinary analysis of the issue of insider dealing from the perspective of the applicability of criminal law to regulate it. First, it examines the nature of its prohibition in the European Union and in the United States of America. The text includes a more extensive overview of prohibition in four Member States of the European Union (France, the United Kingdom,

Luxembourg and Poland). Then, it summarises the arguments presented by ethicists and economists in favour of and against insider dealing. Further, it analyses the foundations of criminal law and justifications that are given for its application. On the basis of this analysis, it presents a new two-step theory of criminalisation. The first step is based on a liberal theory of wrongfulness that makes reference to protection of the basic human rights. The second step relies on classical but

often forgotten principles of criminal law. Finally, it examines possible alternatives to criminal rules.

Kluwer Law International B.V.

Aerospace Law and Policy Series, Volume 22 For more than three decades, Luxembourg has been at the forefront of commercial and cooperative initiatives that have shaped a vibrant space economy. Since 2017, this formidable role in global enterprise has been brought to legal fruition

with three farseeing laws designed to make Luxembourg the most favorable jurisdiction for registering commercial missions to exploit space resources. This book presents expert article-by-article commentary on these laws by scholars from the staff of the renowned SES Chair in Space, Satellite Communications and Media Law of the University of Luxembourg, as well as the first non online publication in English of the laws otherwise only available

in French. For investors and operators seeking a safe and attractive legal environment in space resources activities, the Commentary will greatly clarify such crucial matters as the following: whether the authorization procedure is smooth or cumbersome, affordable or expensive; whether and which insurance is required; whether potential liability for damage caused by a space object will be capped or not; and procedures and consequences attached to

termination of space activity. Each section of the Commentary follows the same structure: first the English text of the article, then its drafting history (genesis and context), then legal interpretation, and finally evaluation, including comparison with space laws of other countries. The pace of innovation in space-related technology continues to accelerate, but making tomorrow's technical possibilities a reality requires practical legal support today. This valuable tool for the

further economic development of a dynamic and competitive commercial sector offers a clear legal framework ensuring that private operators, investors and entrepreneurs working in space can be confident about their rights, including their rights to the resources they extract. The book also represents a milestone in space law for academics and practitioners in the field.

Familiarity with

guarantees and how they function under various national jurisdictions are essential for principals, guarantors, and beneficiaries of international contracts. This enormously useful handbook provides a practical overview of the guarantee regimes in twenty-eight European countries, with country-by-country contributions from regional expert practitioners and academics. For easy comparison, each country report follows the same structure, from

preliminary discussion on the provisions of a guarantee to its negotiation, drafting, and enforcement. Focusing on specific issues to consider at every stage, each chapter provides detailed information and guidance on such aspects as the following: . who can issue guarantees; . limitations as to the type of obligations which may be subject to a guarantee; . issues relating to the protection of the contracting parties; . formal requirements which need to be

complied with; . stamp duties or other tax payable; . presence of implied terms; . legal framework applicable to joint and several obligations; . modification of the situation; . conditions for release and actions to be taken to ensure a valid release; . opening of bankruptcy proceedings against the principal; . court enforcement; and . incorporation of uniform rules. Each chapter includes references and model guarantee forms that readers can use to

draft their own documents. Invaluable to corporate counsel and law firms with an international practice, this peerless handbook will prove the first order of business in trade negotiations across Europe, among European nations themselves as well as with their global partners.

Extending the Boudaries Of Trust and Similar Ring-Fenced Funds IBFD

Luxembourg Company Laws and Regulations Handbook - Strategic Information and Basic Laws

International Encyclopedia of Comparative Law
Kluwer Law International
B.V.

Virtually every jurisdiction today is busy developing private international law rules to deal with trusts and similar ring-fenced structures. With the increasing impact of globalisation, business interests throughout the world are intent on maximising the potential of such structures for raising funds, lowering risks, and cutting costs. As a result, numerous complex issues involving

the traditional categories of settlor, beneficiary, and fiduciary are being radically transformed. Extending the Boundaries of Trusts and Similar Ring-Fenced Funds offers valuable analyses, by sixteen well-known authorities in the field, of a broad range of trust-related issues. The many important insights in this book reveal the workings of such issues as the following: the disappearing divergence between common law and civil law jurisdictions in the matter of trusts; using

the segregated fund concept to manage the risk of insolvency; the demise of the "amateur trustee" in the charitable trust sector; why loss to the fund supersedes particular losses of beneficiaries; the legal dimensions of hiding ownership by "giving" property to trustees; the intervention of public policy in questions of perpetuity; the selective imposition of OECD and FTF transparency initiatives on offshore jurisdictions; and "policing" of trustee

behaviour by beneficiaries. Lawyers, bankers, and others dealing with investment and business finance will find much information as well as food for thought in this fascinating book, as will those involved in the traditional trust industry, whether as trustees or lawyers or fund managers. Most of the essays in this outstanding thematic collection were originally prepared for presentation at a conference held in 2001 at King's College London.

Business organisations depend on having one or more persons who can legitimately make strategic business decisions. But what are the legal entitlements of such key professionals? This is the first book – with contributions from experts across Europe – to take a broad comparative look at how the delimitation of rights and duties of executive and non-executive managers is done under different areas of EU law and

across different jurisdictions (namely, EU and national law). Aspects of the executive role covered include the following: extensive treatment of definitions and methodologies to ascertain the status of managers as ‘workers’ in Europe; comprehensive interdisciplinary and comparative analysis of cross-cutting issues affecting managers in Europe, including complexities arising from national variations in governance structures and roles and functions of

managers; comprehensive analysis of cases before the European courts with full awareness of applicable rules; distinction between registered front directors and those who act as de facto managers; how employees (and to some degree other stakeholders) may be involved in management; trends in current EU law that increase the need to protect managers; trends that increase the need to hold managers liable;

right to inter alia information and consultation, occupational health and safety, non-discrimination and free movement; and recognition that managers may not necessarily be powerful professionals with strength vis-à-vis the company as employer. According to EU statistics, in 2019, nearly 9.4 million persons held a managerial position across the EU's Member States, meaning that many managers

currently can no longer inherently be considered unworthy of employment protection. The legal status of these individuals thus cannot be sidestepped. This very important volume accordingly will be of value to practitioners, policymakers, and academics in employment and labour law. *Regulating and Supervising Investment Services in the European Union* Kluwer Law International B.V.
