The Philippine Review of Business and Economics The Philippine Review of Business and Economics University training for business Business Practices Why have Taiwan, rich parts of China, and Thailand boomed famously, while the Philippines has long remained stagnant both economically and politically? Do booms abet democracy? Does the rise of middle "classes" promise future

liberalization? Why has Philippine democracy brought no boom and barely served the Filipino people? This book, unlike previous books, shows that both the roots and results of growth are largely political, not just economic. Specifically, it pays attention to local, not just national, power networks that caused or prevented growth in the aforementioned countries. Violence has been common in these politics, along with money. Elections have contributed to socio-political problems that are also obvious in Leninist or junta regimes, because elections are surprisingly easy to buy with corrupt

money from government contracts. Liberals should pay more serious theoretical attention to the effects of money on justice, and Western political science should focus more clearly on the ways non-state local power affects elections. By considering the role of local money and power (above all, from small- and medium-sized firms that emerged after agrarian reforms) on elections and justice, this book asks democrats squarely to face the extent to which electoral procedures have failed to help ordinary citizens. Students and scholars of Asia will all need this book - as will students of the

West whose methods have become parochial.

During the First World War, ill-advised steps by colonial officials in the Philippines who were responsible for the colony's finances created a crisis which lasted from 1919 until 1922. The circumstances shook the foundations of the American colonial state and contributed to Manuel L. Quezon's successful effort to replace Sergio Osmeña as leader of the politically dominant Nacionalista Party. These events have generally been blamed on a corruption scandal at the Philippine National Bank, which had been established in 1916 as a multi-purpose, semi-governmental agency whose purpose was to provide loans for the agricultural export industry, to do business as a commercial bank, to issue bank notes, and to serve as a depository for government funds. Based on detailed archival research, Yoshiko Nagano argues that the crisis in fact resulted from mismanagement of currency reserves and irregularities in foreign exchange operations by American officials, and that the notions of a "corruption

scandal" arose from a colonial discourse that masked problems within the banking and currency systems and the U.S. colonial administration. Her analysis of this episode provides a fresh perspective on the political economy of the Philippines under American rule, and suggests a need for further scrutiny of historical accounts written on the basis of reports by colonial officials.

This book compares the experiences of the Philippines and Vietnam to gain insight into how openness to trade and financing can increase prosperity. In contrast, theoretical and empirical work in the 20th and early 21st centuries have returned mixed results regarding this assertion. The book also demonstrates the impracticality of any attempt to pursue prosperity in isolation. Chapter 1 discusses recent data and research on international trade and capital mobility. Chapter 2 describes the economy of Vietnam that has grown rapidly since beginning to open in 1994. Chapter 3 relates the stagnation of the Philippines as it remained closed from 1960 to 1994 and examines the recent rapid growth in spite of the continued relative restrictiveness of Philippine policy. Chapter 4 compares the two experiences and then conjectures about the feasibility of a prosperous autarky.

A growing number of higher education institutions in Asia are now integrating ethics courses in their curricula. But the challenge remains to develop courses that can effectively reach their objectives, and to create and use teaching materials appropriate to the particular profile of the students and executives in different regions and cultures. In this context, enhancing awareness for ethical dilemmas, proposing frameworks and models to help managers handle difficult choices and demanding decisions - while not being moralistic and imposing values - , and presenting alternative approaches through recent and relevant cases are the main objectives of this book. It examines teaching methods, learning tools and pedagogical methods effective in the teaching of ethics within the particular context of the rich diversity of Asian cultures, and discusses ethics courses curricula, aiming at developing the capacity to deal with a number of issues such as corruption, intellectual property protection, whistle blowing and consumer rights. The relevance and limits of Asian philosophical and spiritual traditions and

how their underlying values can be a meaningful aspect in the teaching of ethics to managers and business leaders are explored, as are the benefits and limits of corporate codes of conduct and ways to enhance their effectiveness. A similar approach is taken to the introduction of “oaths” and “ethics pledges” among business students, which has been promoted in some business schools.

A Brief History of the University of the Philippines World Trade Press

A major field in the worlds of education, training, and social sciences is the field where learners are inculcated with special interests in society and the relationships

between individuals in society. Social science has always been an important instrument that allows us to gain an understanding of social phenomena and changes by providing commentaries, producing explanations, and attempting to synthesize a diversity of information sets to formulate theories. However, as changes take place in nearly every aspect of the modern world at an increasing speed, there quickly emerges new factors that have never been incorporated into the analytical framework in recent decades. Modern Perspectives and Current Trends in Asian Education, Psychology, and Sociology presents the current trends in education, psychology, and sociology. It serves as a collection of empirical research and academic recommendations that are current and contemporary. Covering topics such as learner identity, employee performance, and organizational identification and trust, this major reference work is an essential resource for educators and administrators of both K-12 and higher education, pre-service teachers, teacher educators, government officials, librarians, sociologists, psychologists, students of higher

education, researchers, and academicians.
Business Organizations in the Philippines and Their Current Problems Business Expert Press

Much of the existing literature within the "varieties of capitalism " (VOC) and "comparative business systems " fields of research is heavily focused on Europe, Japan, and the Anglo-Saxon nations. As a result, the field has yet to produce a detailed empirical picture of the institutional structures of most Asian nations and to explore to what extent existing theory applies to the Asian context. The Oxford Handbook of Asian Business Systems aims to address this imbalance by exploring the shape and consequences of institutional variations across the political economies of different societies within Asia. Drawing on the deep knowledge of 32 leading experts, this book presents an empirical, comparative institutional analysis of 13 major Asian business systems between India and Japan. To aid comparison, each country

chapter follows the same consistent outline. Complementing the country chapters are eleven contributions examining major themes across the region in comparative perspective and linking the empirical picture to existing theory on these themes. A further three chapters provide perspectives on the influence of history and institutional change. The concluding chapters spell out the implications of all these chapters for scholars in the field and for business practitioners in Asia. The Handbook is a major reference work for scholars researching the causes of success and failure in international business in Asia.
