Scores of talented and dedicated people serve the forensic science community, performing vitally important work. However, they are often constrained by lack of adequate resources, sound policies, and national support. It is clear that change and advancements, both systematic and scientific, are needed in a number of forensic science disciplines to ensure the reliability of work, establish enforceable standards, and promote best practices with consistent application. Strengthening Forensic Science in the United States: A Path Forward provides a detailed plan for addressing these needs and suggests the creation of a new government entity, the National Institute of Forensic Science, to establish and enforce standards within the forensic science community. The benefits of improving and regulating the forensic science disciplines are clear: assisting law enforcement officials, enhancing homeland security, and reducing the risk of wrongful conviction and exoneration. Strengthening Forensic Science in the United States gives a full account of what is needed to advance the forensic science disciplines, including upgrading of systems and organizational structures, better training, widespread adoption of uniform and enforceable best practices, and mandatory certification and accreditation programs. While this book provides an essential call-to-action for congress and policy makers, it also serves as a vital tool for law enforcement agencies, criminal prosecutors and attorneys, and forensic science educators.

The expansion of international tourism is changing the relationship between ethnic groups and states around the globe. Yet tourism's importance for the understanding of ethnicity in the modern world has been generally neglected within the field of ethnic studies. This pioneering volume investigates how international tourism development, state policies of ethnic management, and the active responses of local ethnic groups intersect to reshape ethnic identities and ethnic relations in Asian and Pacific societies. It analyzes the ways in which the very meaning of ethnicity and culture are being contested and reworked in the wake of tourism's impact. Following an introduction that explores the close but often ambivalent relationship between tourism promotion and state ethnic policies, individual contributors examine tourism's varied effects in China, Singapore, Malaysia, Thailand, Indonesia, and the island Pacific in rich ethnographic detail.

This 2018 Article IV Consultation highlights that the macroeconomic performance in Georgia since the global financial crisis has been positive. Growth was higher than that in most peers. The banking sector has remained stable, and foreign reserves have increased. After two years of sluggish growth, following the 2014 regional slowdown, growth has picked up and the external position strengthened. Supported by external demand and buoyant consumption, real GDP grew 5 percent in 2107. The near-term outlook has improved moderately and the output gap is expected to close gradually in 2019–20. Over the medium to long term growth is expected to accelerate moderately and external vulnerabilities to decrease, thanks to the dividends from structural reforms.

From its birth in 1913 to its abolition in 2021, film censorship marked the history of Italian cinema, and its evolution mirrored the social, political, and cultural travail of the country. During the Fascist regime and in the postwar period, censorship was a powerful political tool in the hands of the ruling party; many films were banned or severely cut. By the end of the 1960s, censors had to cope with the changing morals and the widespread diffusion of sexuality in popular culture, which led to the boom of hardcore pornography. With the crisis of the national industry and the growing influence of television, censorship gradually changed its focus and targets. The book analyzes Italian film censorship from its early days to the present, discussing the most controversial cases and protagonists. These include such notorious works as Last Tango in Paris and Salo, or the 120 Days of Sodom, and groundbreaking filmmakers such as Luchino Visconti, Federico Fellini and Pier Paolo Pasolini, who pushed the limits of what was acceptable on screen, causing scandal and public debate.

This Special Issue addresses relations between tourism activities, smart specialization strategies, and sustainable development at different territorial levels, including the local, regional, national, and international. Framed by appropriate conceptual frameworks to define the contemporary dynamics of innovation in tourism, case studies supported by advanced quantitative methods and

developed in rural and urban areas of Asia, Europe, and Africa are presented and discussed. The concept of smart specialization inspires the formulation of regional innovation policies and strategies, emphasizing the importance of endogenous resources and existing territorial capabilities. By exploring the diversity and variety of each economy to develop inter-sectoral relations, this approach aims at promoting the creation of spillover effects of innovation processes supported by adequate key enabling technologies, potentially leading to the sustainable

development of places, regions, and countries. As an activity that mobilizes contributions from different economic sectors, tourism may play a central role in such strategies. As described and discussed in this Special Issue, aspects related to the creative sectors of economies, information and communication technologies, traditional products and lifestyles, food production, or diverse cultural values can be mobilized to generate innovative and sustainable solutions for tourism development.
