Risk-preparedness is a critical part of a wiser use of our cultural environments. Risk analysis and mitigation ensure better use of scarce resources and optimal conditions for extending the life of cultural property. A cultural-heritage-at-risk framework offers those concerned with the conservation of the built environment the

chance to fully root their efforts in a concern for the preventive for the first time in the history of the movement.

A new eye-opener on how we can make better decisions—by the author of Gut Feelings In this age of big data we often trust that expert analysis—whether it's about next year's stock market or a person's risk of getting cancer—is accurate. But, as risk expert Gerd Gigerenzer reveals in his latest book, Risk Savvy, most of us, including doctors, lawyers, and financial advisors, often

misunderstand statistics, leaving us misinformed and vulnerable to exploitation. Yet there's hope. In Risk Savvy, Gigerenzer gives us an essential guide to the science of good decision making, showing how ordinary people can make better decisions for their money, their health, and their families. Here, Gigerenzer delivers the surprising conclusion that the best results often come from considering less information and listening to your gut.

Düsseldorf im August. Ein Giftanschlag auf unser Trinkwasser. Menschen sterben und die Behörden setzen alle Hebel in Bewegung, dort zu suchen, wo nichts zu finden ist. Noch 152 Stunden. Der Hacker weiß nicht, wie ihm geschieht. Sein Vormund will ihn entmündigen lassen, seine Großmutter liegt vergiftet im Krankenhaus und seinen neuen Job hat er nicht zufällig bekommen. Noch 137 Stunden. Die Putzfrau flieht vor ihrer Vergangenheit, jedoch nicht schnell genug. Die Ereignisse zwingen sie zum dümmsten Fehler, den man in ihrer Branche begehen kann. Sie muss vertrauen. Noch 98 Stunden. Der Kommissar wird in die EU-Umweltbehörde weggelobt. Der langweiligste Job der Welt. Sein erster Fall beginnt mit Kröten und Pferden; er nimmt eine Wasserprobe in einer Talsperre. Noch 79 Stunden. Echtzeit - Wer die Wahrheit quält Der Kommissar, die Putzfrau und der Hacker, drei Leben und keine Gerechtigkeit. Jetzt noch wahrer - ein Spiel gegen 100.000 Lügen. Crossing Languages to Play with Words Gunter Narr Verlag  
 "If I really wanted to open up, I'd confess that I really am the liar everyone believes I

am." High-school junior Tola Riley has green hair, a nose ring, an attitude problem, and a fondness for fairy tales, which are a great escape from real life. Everyone thinks she's crazy; everyone says so. Everyone except Mr. Mymer, her art teacher. He gets her paintings and lets her hang out in the art room during lonely lunch periods. But then rumors start flying and Tola is suddenly the center of a scandal. The whole town is judging her—even her family. When Mr. Mymer is suspended for what everyone thinks is an affair, she has no choice but to break her silence. Fairy tales won't help her this time . . . so how can she tell the truth? And, more importantly, will anyone believe her? The Wall and the Wing Routledge  
 How can performing be transformed into cognition? Knowing in Performing describes dynamic processes of artistic knowledge production in music and the performing arts. Knowing refers to how processual, embodied, and tacit knowledge can be developed from performative practices in music, dance, theatre, and film. By exploring the field of artistic research as a constantly transforming space for participatory and

experimental artistic practices, this anthology points the way forward for researchers, artists, and decision-makers inside and outside universities of the arts. **The Hacker's Dictionary** Springer

 This open access volume provides insight into how organizations change through the adoption of digital technologies. Opportunities and challenges for individuals as well as the organization are addressed. It features four major themes: 1. Current research exploring the theoretical underpinnings of digital transformation of organizations. 2. Insights into available digital technologies as well as organizational requirements for technology adoption. 3. Issues and challenges for designing and implementing digital transformation in learning organizations. 4. Case studies, empirical research findings, and examples from organizations which successfully adopted digital workplace learning. Good Girls Baen Books  
 The fourth volume of the DIGAREC Series holds the proceedings to the conference Logic and Structure of the Computer Game", held at the House of Brandenburg-

Prussian History in Potsdam on November 6 and 7, 2009. The conference was the first to explicitly address the medial logic and structure of the computer game. The contributions focus on the specific potential for mediation and on the unique form of mediation inherent in digital games. This includes existent, yet scattered approaches to develop a unique curriculum of game studies. In line with the concept of 'mediality', the notions of aesthetics, interactivity, software architecture, interface design, iconicity, spatiality, and rules are of special interest. Presentations were given by invited German scholars and were commented on by international respondents in a dialogical structure.

The concept of archetypes is at the core of C. G. Jung's analytical psychology. In this interesting and accessible volume, Roesler summarises the classical theory of archetypes and the archetypal stages of the individuation process as it was developed by Jung and his students. Various applications of archetypes, in cultural studies as well as in clinical

practice, are demonstrated with detailed case studies, dream series, myths, fairy tales, and so on. The book also explores how the concept has further developed as a result of research and, for the first time, integrates findings from anthropology, human genetics, and the neurosciences. Based on these contemporary insights, Roesler also makes a compelling argument for why some of Jung's views on the concept should be comprehensively revised. Offering new insights on foundational Jungian topics like the collective unconscious, persona, and shadow, C. G. Jung's Archetype Concept is of great interest to Jungian students, analysts, psychotherapists, and scholars.

A thorough multidisciplinary analysis of various perspectives on internet privacy was published as the first volume of a study, revealing the results of the achatech project "Internet Privacy - A Culture of Privacy and Trust on the Internet." The second publication from this project presents integrated, interdisciplinary options for improving privacy on the Internet utilising a normative, value-oriented approach. The

ways in which privacy promotes and preconditions fundamental societal values and how privacy violations endanger the flourishing of said values are exemplified. The conditions which must be fulfilled in order to achieve a culture of privacy and trust on the internet are illuminated. This volume presents options for policy-makers, educators, businesses and technology experts how to facilitate solutions for more privacy on the Internet and identifies further research requirements in this area.

Some people would say this is the story of a photograph. How it was taken and what happened to me after the whole world saw it. And it is. But it's also the story of a lot of other things. So look at the picture all you want. I am so much more than what you see.

Wordplay involving several linguistic codes is an important modality of ludic language. This volume offers a multidisciplinary approach to the topic, discussing examples from different epochs, genres,

and communicative situations. The contributions illustrate the multi-dimensionality, linguistic make-up, and the special interactive potential of wordplay across linguistic and cultural boundaries, including the challenging practice of translation.

The computer and particularly the Internet have been represented as enabling

technologies, turning consumers into users and users into producers. The unfolding online cultural production by users has been framed enthusiastically as participatory culture. But while many studies of user activities and the use of the Internet tend to romanticize emerging media practices, this book steps beyond the usual framework and analyzes user

participation in the context of accompanying popular and scholarly discourse, as well as the material aspects of design, and their relation to the practices of design and appropriation.
