ALEXIS GABRIELLE

The Belt and Road Initiative Routledge
China's Belt and Road Initiative (BRI) is a potential gamechanger for the Central Asia and South Caucasus (CASC) region. CASC countries naturally view this massive development program as a unique

opportunity to accelerate their economic development through increased foreign investment, upgraded physical infrastructure, and tighter economic relationships with their neighbors. Yet embracing the BRI is not without risks. Some BRI investments may prove to be fiscally unsustainable, economically and financially unviable, and socially and

environmentally harmful. Inadequate cross-border coordination and infrastructure maintenance could render some BRI investments wasteful or redundant. If not proactively addressed, these risks have the potential to leave countries worse off for having participated in the BRI. Policymakers in the CASC region and their development partners, thus, face a daunting

question: how to realize the promise of the BRI for their countries while avoiding the pitfalls that lie along the way? This book attempts to answer this question by leveraging the unique insights of development experts in the CASC region. Drawing on the most comprehensive review of BRI investment data conducted to date, this book presents a dynamic policy agenda that is relevant to any country in which China is building the Belt and Road.

Regions in the Belt and Road Initiative GRIN Verlag

Since the emergence of post-Soviet states in the Eurasian space there has been considerable reflection on the role that the state has played in the local and global arenas. Transformation from being part of the 'Soviet' to independent existence has meant state involvement in the forging of new nations out of disparate identities based on the criteria of national languages, the reinterpretation of

historical events, depiction of personality-centric themes, the portrayal of illustrative careers and the rhetoric of development. This volume focuses on some of the aspects of this involvement through studies of the performative role of the Central Asian states in the arena of politics, diplomacy, culture, historical memory, and their interaction within the Eurasian space. It reflects on ways in which the state reacts to society and how discourses in the

field of economy, society and culture dovetail with or diverge from the political discourse about state-building. Relations between formal institutions and informal structures; emerging conceptions of democracy in the context of the Tulip Revolution in Kyrgyzstan and the disruptive events in western Kazakhstan during the twentieth anniversary of the republic's independence; the nature of bilateral and multilateral alignments among regional and interregional actors are

some of the aspects through which the role of the state has been examined by the authors. The volume seeks to address the question of how the state acts as an agent of influence and control not just on performative traditions but also in the creation of a single community as the basis for a nation *China's Eurasian Dilemmas* Oxford University Press This book argues that the world order is no longer unipolar, and the war in Ukraine proves this fact.

As this study describes and theorizes, it has been transformed into a Multipolar World Order 2.0 stage. This title critically examines Chinese, US, Russian, EU, Indian, and a number of other powers' cooperation and competition over security, diplomatic, economic and cyberspace issues. Accomplished scholars from various regions of the Eurasian continent consider the impact of the Russo-Ukrainian war, the Sino-Russian strategic partnership, China's relations with the United

States and the European Union, the influence of the Belt and Road Initiative, the expansion of the Shanghai Cooperation Organization and Eurasian Economic Union, China's policies in the Middle East, Central Asia, Indo-Asia Pacific, the South Caucasus, Central and Eastern Europe, as well as focus on details of growing contradictions and collaboration in the Eurasian continent over markets, technologies, digital leadership, vaccine distribution, and financial institutions in the Era of

Multipolar World Order 2.0. Showing that the US-centred unipolar world order is replaced by Multipolar World Order 2.0 where conflicting powers fight to keep or extend their spheres of influence, this volume is of great interest to decision makers, diplomats, scholars and students of international relations, politics, global governance, Eurasian studies, Chinese studies, cybersecurity, and economics, and for those studying human security, international

organizations, and geopolitics.

Understanding China's New Diplomacy Routledge

This book addresses the challenges and opportunities of contemporary and future development of Eurasia. The main theme of the first part of the book is examining the reaction evoked in different countries by the Chinese "Belt and Road Initiative." The second part analyses other national and international integration and infrastructure projects in Eurasia. This

unique publication brings together in one volume works by leading researchers from different countries, all united by their common interest in the political and economic processes unfolding in the Eurasian continent. By offering various points of view from experts from all over the world, this book provides a multi-dimensional analysis of the Eurasian future and will be of value to a wide range of readers, including scholars, publicists, the international business

community and decision-makers.

Strategic Forum India

Penguin Enterprise

China has emerged as a dominant power in Eurasian affairs that not only exercises significant political and economic power, but increasingly, ideational power too.

Since the founding of the People's Republic, Chinese Communist Party leaders have sought to increase state capacity and exercise more effective control over their western frontier through a series of state-building

initiatives. Although these initiatives have always incorporated an international component, the collapse of the USSR, increasing globalization, and the party's professed concerns about terrorism, separatism, and extremism have led to a region-building project in Eurasia. Garcia traces how domestic elite-led narratives about security and development generate state-building initiatives, and then region-building projects. He also assesses how region-building projects

are promoted through narratives of the historicity of China's engagement in Eurasia, the promotion of norms of non-interference, and appeals to mutual development. Finally, he traces the construction of regions through formal and informal institutions as well as integrative infrastructure. By presenting three phases of Chinese domestic state-building and region-building from 1988-present, Garcia shows how region-building projects have enabled

China to increase state capacity, control, and development in its western frontier. Recommended for scholars of China's international relations and development policy.

The China and Eurasia Forum Quarterly
Routledge

The Belt and Road Initiative (hereafter BRI) of China has attracted worldwide attention and participation, causing a lot of debate over its implications for international society. Although it is still in a

budding stage, the BRI seems to afford a framework for an increasing number of countries to explore jointly new international economic governance mechanisms and offer significant opportunities for them to cope jointly with global challenges. Taking a globalization perspective and tracking the ancient silk roads, this book tries to examine the general context in which the BRI is raised and implemented, arguing that this Chinese initiative, instead of

replacing existing international cooperation mechanisms, is a call for the reform and development of neoliberal globalization and will open up a new era of inclusive globalization. Inclusive globalization is neither an overturning nor a simple continuation of neoliberal globalization but rather a proposal capable of addressing the problems of existing globalization. The difference between them lies in the fact that globalization cannot only serve the "spatial fix" of capital but also has to

meet the needs of living people. The book also addresses a number of major issues on building the Belt and Road and contains Chinese media's interviews with the author on various BRI issues. Given the author has been intensively involved in the study of and planning for the BRI, the book offers a valuable academic insight into this Chinese initiative.

**China's Belt and Road:
A Game Changer?** KW
Publishers Pvt Ltd
The second edition of The
Routledge Handbook of

the Belt and Road encompasses the many recent developments across the Belt and Road Initiative (BRI) from 2019 to 2021, while retaining the comprehensive introduction to BRI from the first edition. The Handbook is a comprehensive review of the theory and practice of the BRI, the contributors to which are leading researchers in their fields. It illuminates the intentions and principles, history and current status, basic knowledge and latest studies, and

promotion mechanisms on the whole BRI. This edition includes 132 entries in total, with a supplementary section on the Belt and Road forums for international cooperation, 22 brand new entries, and 13 revised and updated chapters, reflecting current progress. The book provides an authoritative and up-to-date overview of the BRI, and thereupon an explanatory interpretation of China's development strategy and international policy stance. Already

serving as the essential "encyclopaedia" of the BRI, this second edition will be a must-read for members of global think tanks, policy makers, and observers involved in the BRI construction, as well as researchers interested in international relations, Chinese economics, politics, and international policy.

Taylor & Francis
Officially announced by Xi Jinping in 2013, the Belt and Road Initiative (BRI) has since become the centrepiece of China's economic diplomacy. It is

a commitment to ease bottlenecks to Eurasian trade by improving and building networks of connectivity across Central and Western Asia, where the BRI aims to act as a bond for the projects of regional cooperation and integration already in progress in Southern Asia. But it also reaches out to the Middle East as well as East and North Africa, a truly strategic area where the Belt joins the Road. Europe, the end-point of the New Silk Roads, both by land and by sea, is the ultimate geographic

destination and political partner in the BRI. This report provides an in-depth analysis of the BRI, its logic, rationale and implications for international economic and political relations.

The Belt and Road Initiative Routledge

This book facilitates exchanges between scholars and researchers from around the world on China-Eurasia relations. Comparing perspectives and methodologies, it promotes interdisciplinary dialogue on China's pivot towards Eurasia, the Belt

and Road initiative, the Shanghai Cooperation Organization, Beijing's cooperation and arguments with India, the EU, Western Balkans and South Caucasus states and the Sino-Russian struggle for multipolarity and multilateralism in Eurasia. It also researches digitalization processes in Eurasia, notably it focuses on China's Silk Road and Digital Agenda of Eurasian Economic Union.

Multipolarity without multilateralism is a dangerous mix. Great power competitions will

remain. In the Asian regional system more multilateral cushions have to be developed. Scholars from different nations including China, India, Russia, Austria, Armenia, Georgia, United Arab Emirates and Montenegro introduce their own, independent research, making recommendations on the developments in China-Eurasia relations, and demonstrating that through joint discussions it is possible to find ways for cooperation and for ensuring peaceful coexistence. The book will

appeal to policymakers and scholars and students in Chinese, Eurasian, International and Oriental Studies.

Eurasia and India

Edward Elgar Publishing
The war in Afghanistan has added considerably to the strategic significance of Central Asia due to its proximity to the conflict. Moreover, the continuation of the war increasingly involves the vital interests of many other actors other than the U.S. and NATO forces currently there. This monograph, taken from

SSI's conference ("Contemporary Issues in International Security") with European and Russian scholars in 2010, provides a comprehensive analysis of the means and objectives of Russia's involvement in Central Asia. It provides Russian perspectives concerning the other actors in Central Asia and how Moscow views the policy significance of those efforts, and a French analysis of the strategic situation evolving there. For obvious reasons: the war in Afghanistan,

proximity to major global actors, large energy holdings, and for less obvious reasons, i.e., that possibility that domestic instability in one or more of these states could spread to other Muslim states as we now see in the Arab revolutions of 2011, Central Asia is an increasingly important and interesting region.

Financing China's Belt and Road Initiative

Edward Elgar Publishing
Chinese President Xi Jinping announced the Belt and Road Initiative (BRI) in 2013, a

development strategy involving infrastructure development and investments in countries in Europe, Asia and Africa. It has rapidly turned into action, reflected in the establishment of a series of international cooperation mechanisms, landing of cooperation projects, and harvest of some early results. The influence is huge, and controversy is not unexpected. As one of the most frequently mentioned concepts in the official media, how does the “bid to enhance

regional connectivity” construct a unified large market through cultural exchange and integration in practice? What is the status quo of building an innovative pattern with capital inflows, talent pool, and technology database? Routledge Handbook of the Belt and Road is an initial review of the theory and practice of BRI, and is the first handbook of its kind. Contributors are leading subject researchers, aiming to reflect the original intentions and principles, history and

current situation, basic knowledge and latest studies. A total of 117 entries related to the BRI have been included, organised into 12 clear parts covering the following key topics: • China’s reform and opening-up and formation of the BRI • Backstory, concept and framework • The five roads and six economic corridors • Foreign affairs with Chinese characteristics • International action plans relevant and similar to the BRI • Case studies of the BRI implementation and

promotion Routledge Handbook of the Belt and Road is an essential guide for researchers, practitioners and observers involved in the BRI construction. Global think tanks, media practitioners and universities will also find the book a useful reference.

China's Belt and Road Initiative Springer

This book discusses the progress of the BRI as it enters its tenth year after being launched in 2013 and becoming by far the biggest bilateral

development assistance program in the world. The analysis offered herein is based on eleven detailed 'inside-out' country studies by independent experts and the studies presented here explain in an accessible manner how the pace and direction of the BRI has been impacted by the pandemic, the debt distress faced by many countries and the policies adopted by the Chinese authorities to navigate these new challenges. *Eurasian Regionalism* Routledge

What is China's high-speed rail diplomacy? What is China's infrastructure diplomacy? How do they relate to each other and to the country's Belt and Road Initiative? Can China finance the numerous projects around the world under the initiative? This book assesses the important implications of China's new diplomacy for the global political economy. It argues that a new developmental path called 'geo-developmentalism' is in the making: China plays a

leading role in promoting growth and building connections across Eurasia and beyond. China's Western Frontier and Eurasia Routledge China's Belt and Road Initiative (BRI) is completing a decade. There have been varied responses to the Initiative from countries and regions besides the emergence of alternative initiatives and narratives. This sets the stage for evaluating the robustness of the Initiative, its implementation as well as its implications from the

perspective of individual countries and regions across the globe. This book begins by examining China's domestic, economic, maritime and strategic interests as drivers for the Initiative. BRI has been analysed in country-specific, regional and continental contexts. It brings out the experiences and responses from South Asia, Eurasia, East Asia, Southeast Asia, the Arab world, Latin America, the Caribbean as well as from Europe and Africa. Further, BRI has been

studied in the larger context of the US-China competition. The final section explores BRI in the context of the twin challenges of recent times, i.e., the pandemic and Russia-Ukraine conflict. The book concludes with an epilogue which outlines the broad trends related to BRI that have emerged from this study of ICWA. **The Sino-Iranian Relations and Geopolitical Implications** Routledge Located in the center of Asia with one of the

largest land frontiers in the world and 14 neighbors whose dispositions could not easily be predicted, China has long been obsessed with security. In this handbook, an internationally renowned team of contributors provide a comprehensive and systematic analysis of contemporary thinking about Chinese national security. Chapters cover the PRC's historical, ideological and doctrinal heritage related to security, its security arrangements and policies

targeting key regions and nations of the world, the security aspects of the PRC's ground, air, sea, space and cyber forces, as well as the changing and expanding definition and scope of China's security theory and practice.

Central Asia and Regional Security Edizioni Epoké
 "When and why does international order change? Easy to take for granted, international governing arrangements shape our world. They allow us to eat food imported from other

countries, live safely from nuclear war, travel to foreign cities, profit from our savings, and much else. New threats, including climate change and simmering US-China hostility, lead many to worry that the "liberal order," or the US position within it, is at risk.

Theorists often try to understand that situation by looking at other cases of great power decline, like the British Empire or even ancient Athens. Yet so much is different about those cases that we can draw only imperfect

lessons from them. A better approach is to look at how the United States itself already lost much of its international dominance, in the 1970s, in the realm of oil. Only now, with several decades of hindsight, can we fully appreciate it. The experiences of that partial decline in American hegemony, and the associated shifts in oil politics, can teach us a lot about general patterns of international order. Leaders and analysts can apply those lessons when seeking to understand or

design new international governing arrangements on topics ranging from climate change to peacekeeping, and nuclear proliferation to the global energy transition"--
The Making of Eurasia
Routledge
The "Belt and Road" initiative, designed to enhance trade flows and spur long-term regional economic growth through infrastructure projects, has expanded China's overseas construction market. This book, written by prominent

adjudicators, lawyers, scholars, entrepreneurs and consultants with extensive first-hand experience in global construction matters will assist Chinese contractors in identifying, managing and mitigating the inherent risks involved, including those arising from the political, social, economic and legal contexts of the foreign jurisdiction. Drawing on real-life experiences of project managers, lawyers, arbitrators and others—and including summaries of both

successful and unsuccessful cases—the book comprehensively covers the variety of risks facing Chinese contractors of international engineering projects and provides useful advice on how to address them. The issues and topics covered in this book are: understanding the political, social and market environment of the host country; cost and scheduling impacts of host country regulation; dispute resolution mechanisms; site security; health and

medical environment; availability of local goods and materials; appointment of local subcontractors; public relations and social responsibility; and insurance. Questionnaires and interviews covering a wide variety of Chinese overseas construction projects provide expert perspectives on risk analysis and management, best practices, precautions, issues to be adjudicated in arbitrations and much more. Addressing all the practical difficulties and

problems encountered before and during an overseas construction project, the book will help in-house counsel for Chinese enterprises and those who interact with them improve management, reduce risks, and protect rights and interests. It will also serve as a general guide for international engineering contractors, given that the risks Chinese enterprises face in their overseas operations are shared by their international counterparts. Others

welcoming this book include international lawyers, scholars and researchers specializing in construction law, arbitrators, arbitral institutions and international project owners.

China and Eurasia GRIN Verlag

While security concerns have assumed salience across the globe, Afghanistan's proximity to Central Asia has meant that security or perceptions of insecurity dominate the strategic discourse in the region.

Issues that stand out include the challenges that the Central Asian states will face in terms of stability, ethnic tensions, radicalization of youth, destabilization of commodity flows and energy security and the impact that these could have on Central Asian society. However, security cannot just be defined in terms of security at the borders. It needs to be defined in 'cosmopolitan' terms through an array of issues like movements across borders, radicalism within states, the sharing

of water, and various multilateral attempts at combating insecurity. This volume is an attempt to focus on some of these issues that reflect on perceptions of security principally from Indian and Uzbek positions. It examines shifts over the last two decades, from debates on the geopolitical importance of the region from a great game perspective to the salience of new engagements within the international arena. *Chinese Migrants in Russia, Central Asia and*

Eastern Europe Springer Nature
 Introduced in 2013, China's Belt and Road Initiative (BRI) has had a significant impact within Asia and across other regions. This book provides empirical case studies examining the relations between China and the states in specific regional groupings, including South-East Asia, Central Asia, South Asia, the Persian Gulf, the Horn of Africa, and Central/Eastern Europe. At the theoretical level, Buzan and Waever's work

on regional security complexes is used to develop a framework for analyzing the current impact of the BRI and its potential future effects within these regions, while the case studies explore the extent to which different International Relations and International Political Economy theories explain change in these relationships as the regional security environment shifts. The contributors address questions as diverse as the domestic political and

economic drivers impacting the level of BRI cooperation; the effects of cooperation with the US; as well as the historical political and economic risk considerations for China in pursuing BRI cooperation; and the motivations of regional responses to the BRI and rivalries and variations in those responses. This book will be of interest to academics working in the fields of Chinese foreign policy, International Relations, International Political Economy, and area studies.

Professionals in the corporate world and Governmental practitioners and non-government agencies will also find the contributions useful.

The “Roads” and “Belts” of Eurasia Bloomsbury Publishing

Centering on the investment and financing infrastructure of China’s Belt and Road Initiative (BRI), this book puts forth the basic principles and general objectives of constructing a new investment and financing

system of this magnitude. Beginning with a succinct analysis of the practical issues faced while developing the BRI’s investment and financing system, the author puts forward several approaches to optimizing and reestablishing the system for the further advancement of investment and financing among and beyond the Belt and Road countries. Topics include credit rules, management and control systems, investment protection,

dispute settlement and risk assessment while establishing a new mechanism that helps resolve debt defaults, checks for potential corruption and bribery, fosters new growth, and enhances information transparency. The book will be a practical reference for researchers interested in the Belt and Road Initiative and world investment and finance, as well as policymakers, financial institutions and enterprises relevant to the BRI.
