The Little Book of Colour Bloomsbury Publishing USA
 Captain Color vs. The Pigment Pirates: A Handbook for the Modern Colorist By: Dennis Gebhart Like most hairdressers upon their recent Beauty School graduation, Dennis Gebhart believed he learned everything there is to know about the profession. It was only a short time when he discovered he was not as informed as he should be and set out for more education, information, and the pieces he needed to master the craft. Now, forty-plus years after his journey began, he records his findings and lessons in an easy-to-read guide on mastering hair color and being the best stylist you can be. Gebhart challenges the many belief systems and marketing stories that have confused colorists for ages and "rocks the boat" of conventional thinking, confronting misinformation and setting new hair colorists on a better path of understanding, clear thinking, and success in their careers.

1856. Eighteen-year-old chemistry student William Perkin's experiment has gone horribly wrong. But the deep brown sludge his botched project has produced has an unexpected power: the power to dye everything it touches a brilliant purple. Perkin has discovered mauve, the world's first synthetic dye, bridging a gap between pure chemistry and industry which will change the world forever. From the fetching ribbons soon tying back the hair on every fashionable head in London, to the laboratories in which scientists first scrutinized the human chromosome under the

microscope, leading all the way to the development of modern vaccines against cancer and malaria, Simon Garfield's landmark work swirls together science and social history to tell the story of how one colour became a sensation.

The Art of Hair Colouring Cengage Learning

'Fascinating ... Pitman skillfully navigates the complicated history of our addiction to fair hair, skipping through the centuries with an elegant touch' Independent 'Riveting ... provocative ... ON BLONDES is ultimately a study of power-and powerlessness-between the sexes ... travelling undercover, this brunette produced a book which, like its subject, is wonderfully enlightening' Telegraph In art and literature, in history and popular culture, blonde has never been a mere colour. For 2,500 years, it has been a blazing signal and around this obsession entire industries have developed, influential trends set. From Greek prostitutes mimicking the golden-haired Aphrodite, to the Californian beach babe; from pigeon-dung and saffron dyes to L'Oreal - because you're worth it - we see the lengths to which women will go to become blonde. The power and duality of the blonde as either erotic symbol or saintly virgin waxes and wanes but never disappears. Weaving a story rich in anecdote, history and high intrigue, Joanna Pitman effortlessly combines the wealth of her knowledge with a sharp and clear-sighted view of the power of the blonde throughout the ages.
