Literary Analysis: The Basics Addison-Wesley Longman

An attempt to provide students of literature with an introduction to literary analysis this seeks to involve the student in the process of thinking about literature, showing how to start with one idea and move on to further insights. To do this, several methods - such as using close textual analysis, finding connections, making comparisons, and looking for structures, are described and variously illustrated in action. Works used to illustrate the text include those by Shakespeare, Pope, Chaucer, James, Jonson, Woolf, Fielding, Milton, Hardy, Swift and Melville.
Discourse and Literature Master Books
 "This book will make the case for multiple, diverse kinds of analysis to be taught in the high school English classroom. In addition to showing what written analysis looks like "in the wild," the authors will

provide readers with a framework of fundamental analytical skills for instruction. Importantly, Marchetti and O'Dell will advocate for framing analytical writing around students' (of all levels and abilities) passions and expertise. And just as they do in their previous Heinemann book, *Writing with Mentors*, they will share resources for bringing many different kinds of analytical writing into the classroom"--

McDougal Littell Language of Literature
Jones & Bartlett Publishers

When approaching a literary work, we have a propensity to harp on 'what', that is, the issues that a literary work contains or propagates at the expense of 'how' the issues are brought to the fore. Content cannot be articulated through sheer nothingness. Content cannot just bafflingly drop from heaven like manna. Content in Literature can only be expressed through utilization of particular linguistic and paralingual items in a particular way. This means that without form, there is no content. On the other hand, one cannot just have a form that conveys vacuity. Style has to transmit or be made of some content. Subsequently, an interpretation of literary matter that endeavours to compartmentalize these two core aspects (style and theme), as if they could subsist apart from each other is utterly flawed. In this book, the writer therefore endeavours to show how form and content in Literature are inseparable entities and how a profitable analysis of Literature demands an approach that investigates how each of these aspects impacts upon the other.

This book proposes an extension of Cognitive Grammar (Langacker 1987, 1991, 2008) towards a cognitive discourse grammar, through the unique environment that literary stylistic application offers. Drawing upon contemporary research in cognitive stylistics (Text World Theory, deixis and mind-modelling, amongst others), the volume scales up central Cognitive Grammar concepts (such as construal, grounding, the reference point model and action chains) in order to explore the attenuation of experience - and how it is simulated - in literary reading. In particular, it considers a range of contemporary texts by Neil Gaiman, Jennifer Egan, Jonathan Safran Foer, Ian McEwan and Paul Auster. This application builds upon previous work that adopts Cognitive Grammar for literary analysis and provides the first extended account of Cognitive Grammar in contemporary fiction.
