**Boatbuilding Manual** Seloc Marine Tune-Up and Repai

This short paperback gives a wealth of information on small boats and their safe operation.

**Jet Boat Waterjet Operators Manual S3 Series** Seloc Publications

After a successful career in centreboard racing dinghies, Ian Oughtred became one of the leading lights of the British wooden boat revival, designing, building and sailing many remarkable craft. These boats have gained a world-wide reputation for their elegance of line, sound construction and excellent sailing performance. His perfectionist approach may be unbusinesslike, but provides highly refined designs and detailed plans. In this he hopes to encourage a return to a deep appreciation of traditional values of craftsmanship, believing this is the vital part of the true education, and thus helps to nourish the human spirit in an impoverished age.

This manual guides those new to the S4 water jet nozzle and bucket system in how to get the system up and running, and what effect moving the bridge controls will have on the movement of the vessel. Mangusta, Leopard, and Azimut - Bennetti are among the motor yacht manufacturers using the S4 series waterjet. The contents of the book are indispensable to avoid instant collision on the first manoeuvres and provide "a way" to those without one. If you have just been offered employment on a jet boat, and you don't know what to do or how it works, this book might just save you on your first few times out. If you own a jet drive yacht and your captain is perfect in every way, but for lengthy and complicated manoeuvring sessions, perhaps sliding this book under his cabin door would be a diplomatic way to start the journey towards learning slick, safe and repeatable methods, guaranteed to please those on board and shore observers alike. The authors contact details for on board bridge tuition are included in the book.
