COHEN REAGAN

The Restructuring of South African Higher Education

Routledge
 Education as if people and planet mattered In Transformative Learning, Satish Kumar reflects on the legacy of Schumacher College, a beacon of innovation that fosters an ecological-based, holistic model of higher education built around the college's unique "learn by doing," head, heart, and hands pedagogy. Over fifty current and former instructors and alumni, including Vandana Shiva, David Orr, Kate Raworth, Fritjof Capra, Bill McKibben, Mary Evelyn Tucker, and Jonathon Porritt, paint a rich picture of education for human well-being and the ecological health of the planet. Contributions delve deeply into the nature of transformational learning and holistic education, present a wealth of alumni experiences of working towards an ecological society, and detail the expansion of the Schumacher model to Belgium, Brazil, India, Japan, and beyond. The result is a rich tapestry of ideas and educational methods packed with insights and experience for practitioners and activists looking to build a just, ecological society.

Applied Ethnomusicology Gill

This book contains eight papers from a detailed study of technical college provision in KwaZulu-Natal, South Africa, that raised the following four issues relevant to the transformation of technical colleges across South Africa: (1) the teaching and learning environment at technical colleges is suboptimal; (2) social relations at the technical colleges are tense, with few institutions having successfully come to terms with the rapid deracialization of student enrollments in recent years; (3) the labor market surrounding technical colleges appears totally dysfunctional, with few students obtaining employment after technical college training; and (4) the separate development policies of the past necessitate institutional restructuring. The following papers are included: "A Study of Technical Colleges in KwaZulu-Natal: A Methodological Introduction" (Andre Kraak, Graham Hall); "Problems Facing Further Education and Training" (Andre Kraak); "Planning Imperative: New Policy Framework in FET [Further Education and Training]" (Andre Kraak); "Socio-Economic and Educational Profile of KwaZulu-Natal" (Nisaar Mahomed); "Quantitative Overview of the Technical Colleges of KwaZulu-Natal" (Graham Hall); "Learning, Teaching and Management Environment: Evidence from Qualitative Studies" (Andre Kraak); "Autonomy and Responsiveness: Evidence from the Qualitative Case Studies" (Andre Kraak); and "Critical Overview: The Need for Labour Market and Institutional Reform" (Andre Kraak). The

bibliography contains 52 references. (MN)

Responding to Oil Spills in the U.S. Arctic Marine Environment

International Council of Swedish Industry
 This latest version of Information Resources in Toxicology (IRT) continues a tradition established in 1982 with the publication of the first edition in presenting an extensive itemization, review, and commentary on the information infrastructure of the field. This book is a unique wide-ranging, international, annotated bibliography and compendium of major resources in toxicology and allied fields such as environmental and occupational health, chemical safety, and risk assessment. Thoroughly updated, the current edition analyzes technological changes and is rife with online tools and links to Web sites. IRT-IV is highly structured, providing easy access to its information. Among the "hot topics covered are Disaster Preparedness and Management, Nanotechnology, Omics, the Precautionary Principle, Risk Assessment, and Biological, Chemical and Radioactive Terrorism and Warfare are among the designated. • International in scope, with contributions from over 30 countries • Numerous key references and relevant Web links • Concise narratives about toxicologic sub-disciplines • Valuable appendices such as the IUPAC Glossary of Terms in Toxicology • Authored by experts in their respective sub-disciplines within toxicology

Ulrich's International Periodicals Directory New Society Publishers

Highlighting and illustrating several important and interesting theoretical trends that have emerged in the continuing development of instructional technology, this book's organizational framework is based on the notion of two opposing camps. One evolves out of the intelligent tutoring movement, which employs artificial-intelligence technologies in the service of student modeling and precision diagnosis, and the other emerges from a constructivist/developmental perspective that promotes exploration and social interaction, but tends to reject the methods and goals of the student modelers. While the notion of opposing camps tends to create an artificial rift between groups of researchers, it represents a conceptual distinction that is inherently more interesting and informative than the relatively meaningless divide often drawn between "intelligent" and "unintelligent" instructional systems. An evident trend is that researchers in both "camps" view their computer learning environments as "cognitive tools" that can enhance learning, performance, and understanding. Cognitive tools are objects provided by the instructional environment that allow students to incorporate new auxiliary methods or symbols into their social problem solving which otherwise would be unavailable. A final section of the book represents researchers who are assimilating and accommodating the wisdom and creativity of their neighbors

from both camps, perhaps forming the look of technology for the future. When the idea of model tracing in a computer-based environment is combined with appreciation for creative mind-extension cognitive tools and for how a community of learners can facilitate learning, a camp is created where AI technologists and social constructivist learning theorists can feel equally at home.

Information Resources in Toxicology Washington : Library of Congress

U.S. Arctic waters north of the Bering Strait and west of the Canadian border encompass a vast area that is usually ice covered for much of the year, but is increasingly experiencing longer periods and larger areas of open water due to climate change. Sparsely inhabited with a wide variety of ecosystems found nowhere else, this region is vulnerable to damage from human activities. As oil and gas, shipping, and tourism activities increase, the possibilities of an oil spill also increase. How can we best prepare to respond to such an event in this challenging environment? Responding to Oil Spills in the U.S. Arctic Marine Environment reviews the current state of the science regarding oil spill response and environmental assessment in the Arctic region north of the Bering Strait, with emphasis on the potential impacts in U.S. waters. This report describes the unique ecosystems and environment of the Arctic and makes recommendations to provide an effective response effort in these challenging conditions. According to Responding to Oil Spills in the U.S. Arctic Marine Environment, a full range of proven oil spill response technologies is needed in order to minimize the impacts on people and sensitive ecosystems. This report identifies key oil spill research priorities, critical data and monitoring needs, mitigation strategies, and important operational and logistical issues. The Arctic acts as an integrating, regulating, and mediating component of the physical, atmospheric and cryospheric systems that govern life on Earth. Not only does the Arctic serve as regulator of many of the Earth's large-scale systems and processes, but it is also an area where choices made have substantial impact on life and choices everywhere on planet Earth. This report's recommendations will assist environmentalists, industry, state and local policymakers, and anyone interested in the future of this special region to preserve and protect it from damaging oil spills.

News Bulletin of the Institute of International Education Routledge
 Why have so many central and inner cities in Europe, North America and Australia been so radically revamped in the last three decades, converting urban decay into new chic? Will the process continue in the twenty-first century or has it ended? What does this mean for the people who live there? Can they do anything about it? This book challenges conventional wisdom,

which holds gentrification to be the simple outcome of new middle-class tastes and a demand for urban living. It reveals gentrification as part of a much larger shift in the political economy and culture of the late twentieth century. Documenting in gritty detail the conflicts that gentrification brings to the new urban 'frontiers', the author explores the interconnections of urban policy, patterns of investment, eviction, and homelessness. The failure of liberal urban policy and the end of the 1980s financial boom have made the end-of-the-century city a darker and more dangerous place. Public policy and the private market are conspiring against minorities, working people, the poor, and the homeless as never before. In the emerging revanchist city, gentrification has become part of this policy of revenge.

Applied ethnomusicology is an approach guided by principles of social responsibility, which extends the usual academic goal of broadening and deepening knowledge and understanding toward solving concrete problems and toward working both inside and beyond typical academic contexts (International Council for Traditional Music 2007). This edited volume is based on the first symposium of the ICTM's Study Group on Applied Ethnomusicology in Ljubljana, Slovenia in 2008 that brought together more than thirty specialists from sixteen countries worldwide. It contains a Preface, an extensive Introduction, and twelve selected peer-reviewed articles by authors from Australia, Austria, Canada, Germany, Slovenia, Serbia, South Africa, the United Kingdom, and the United States of America, divided into four thematic groups. These groups encompass: diverse perspectives on the growing field of applied ethnomusicology in various geographical and problem-solving contexts; research and teaching-related connotations; the potential in contributing to sustainable music cultures; and the use of music in conflict resolution situations. The edited volume *Applied Ethnomusicology: Historical and Contemporary Approaches* brings together previously dispersed knowledge and perspectives, and offers new insights to various disciplines within the humanities and social sciences. Rooted in diverse scholarly traditions, it addresses a variety of challenges in today's world and aims to benefit the quality of human existence.

[Information Resources in Toxicology, Volume 2: The Global Arena](#) William D. Richards, LLC

Companies operating in complex environments require a rigorous understanding of the economic, political, social and conflict dynamics of which they become part. Such insight helps them navigate substantial risks and challenges, grow their business even in unexpected places, work more effectively with local, national and international actors, and make meaningful contributions to stability and development. This book combines expert analysis, company case stories, and reflections from more than 100 business leaders. Drawing on a vast repository of knowledge and experience, it poses essential questions to better understand a particular complex environment and lead the company within it. It concretely demonstrates how leaders can help their companies meet their full range of goals - technical, financial, legal, reputation and social - by addressing the questions set out in this book. It is an invaluable resource for corporate practitioners and others concerned with company operations in complex environments. The book is the result of an intense and fruitful collaboration among the Africa Centre for Dispute Settlement, University of Stellenbosch Business School; the Corporate Engagement and Reflecting on Peace Practice Programs of CDA; the Geneva Peacebuilding Platform; the Institute for Business in the Global Context of The Fletcher School, Tufts University; the IRENE Institute of ESSEC Business School; the International Council of Swedish Industry; and the Stockholm Policy Group. Authors include Dost Bardouille-Crema, Diana Chigas, Brian Ganson, Kathleen Hamill, Paul Hollesen, Benjamin Miller, Cecile Renouard, Nicklas Svensson, and Achim Wennmann.

[Transformative Learning](#) Routledge
This impressive volume stands out because it teaches both math and the history behind it. It introduces the serious student of math to key concepts of calculus, while offering biographies of important figures as a background to the comprehensive understanding of the field. Readers will gain a solid appreciation for the sometimes competing theories that informed its early history. Though this book is perfect for the serious student, it is accessible to all levels, with coverage of both basic and complex ideas.

Drum Springer

This new fifth edition of *Information Resources in Toxicology* offers a consolidated entry portal for the study, research, and practice of toxicology. Both volumes represents a unique, wide-ranging, curated, international, annotated bibliography, and directory of major resources in toxicology and allied fields such as environmental and occupational health, chemical safety, and risk assessment. The editors and authors are among the leaders of the profession sharing their cumulative wisdom in toxicology's subdisciplines. This edition keeps pace with the digital world in directing and linking readers to relevant websites and other online tools. Due to the increasing size of the hardcopy publication, the current edition has been divided into two volumes

to make it easier to handle and consult. Volume 1: Background, Resources, and Tools, arranged in 5 parts, begins with chapters on the science of toxicology, its history, and informatics framework in Part 1. Part 2 continues with chapters organized by more specific subject such as cancer, clinical toxicology, genetic toxicology, etc. The categorization of chapters by resource format, for example, journals and newsletters, technical reports, organizations constitutes Part 3. Part 4 further considers toxicology's presence via the Internet, databases, and software tools. Among the miscellaneous topics in the concluding Part 5 are laws and regulations, professional education, grants and funding, and patents. Volume 2: The Global Arena offers contributed chapters focusing on the toxicology contributions of over 40 countries, followed by a glossary of toxicological terms and an appendix of popular quotations related to the field. The book, offered in both print and electronic formats, is carefully structured, indexed, and cross-referenced to enable users to easily find answers to their questions or serendipitously locate useful knowledge they were not originally aware they needed. Among the many timely topics receiving increased emphasis are disaster preparedness, nanotechnology, -omics, risk assessment, societal implications such as ethics and the precautionary principle, climate change, and children's environmental health. Opens with an overview of the international toxicology scene, organizations and activities involved with both the science and regulatory framework, and a specific look at the European Union's efforts Offers an extensive collection of chapters covering over 40 countries and their toxicological infrastructure which includes listings of major books and journals, organizations, professional societies, universities, poison control centers, legislation, and online databases Provides the Second Edition of the International Union of Pure and Applied Chemistry's Glossary of Terms Used in Toxicology, a carefully constructed and peer reviewed collation of critical terms in the science Concludes with a potpourri of quotes concerning toxicology and their use in the arts and popular culture Paired with Volume One, which offers chapters on a host of toxicology sub-disciplines, this set offers the most comprehensive compendium of print, digital, and organizational resources in the toxicological sciences with over 120 chapters contributions by experts and leaders in the field
Bridging Work Experience with Academic Qualifications to Improve Employability of Business Studies Graduates in Gauteng Organisation for Economic Co-operation and Development
Why do some individuals decide they want to create businesses and then actually do so? Why do others decide against this course of action, even though they appear to have what it takes to succeed? These two questions were among the first that researchers in the field of entrepreneurship tried to answer. Recently, it seems that the problem is much more difficult to solve than it first appeared thirty years ago. The venture creation phenomenon is a complex one, covering a wide variety of situations. The purpose of this book is to improve our understanding of this complexity by offering both a theory of the entrepreneurial process and practical advice on how to start a new business and manage it effectively. *Entrepreneurship and New Value Creation* is a fascinating, research-driven book that will appeal to graduate students, researchers and reflective practitioners concerned with the dynamics of the entrepreneurial process.

International Professional Practices Framework (IPPF). McGraw-Hill Education (UK)

How can Higher Education Institutions (HEIs) position themselves to be competitive in global market economies? How has widening participation affected the marketing of HEIs? What kind of students do employers want in the twenty-first century? The marketing of higher education has become a natural consequence of the market in which HEIs are created and function. The shift from government grant to fee income, the homogenization of institutions under the title, 'University', the rhetoric of diversification and the realization of competition for students based on reputation and brand (academic and otherwise) has driven institutions to embrace the market. This book is unique in considering these matters as well its attempt to examine the relationship between marketing and the education that is being marketed. These issues are global and touch on the very nature of the place of HEIs in society as well as how they need to position themselves to compete. The readership for this book includes those studying higher education management, as well as those interested in higher education policy issues, but it has something of interest for all those engaged in higher education today.

[Focus on First-year Success](#) HSRC Press

Before 1994, South Africa supported 36 higher education institutions as part of its apartheid legacy. Enforced racial segregation resulted in a plethora of institutions to accommodate specific racial and language groups, which were managed and professionally staffed mostly by white males. Financially, these higher education institutions were an enormous burden for the new state after 1994. This book examines the processes of restructuring, following on the government's decision in 2001/2002 to radically reform the legacy of 'the geopolitical imagination of the apartheid planners' in higher education. This innovative study gets under the skin of what was clearly the most

major intervention in South African higher education since 1959, utilizing a set of site-based observers on each campus and regular interviews with key informants at each case study site. Since the merging of institutions was far-reaching but widely contested, the study gives descriptive information to analyze whether the mergers were helping towards advancing the causes of equity and increasing student access to higher education. A comprehensive range of institutions are covered and the main researchers represent strong diversity in training and perspectives.

Employee Perceptions of the Value Proposition of Employee Assistance Programmes (EAPS) in Addressing Absenteeism at GUD Holdings (Pty) Ltd Jonathan Ball Publishers

A new and unique textbook for Irish nurses, written in an accessible narrative style.

Challenge to a South African University Cambridge University Press

Merrett provides a concise but comprehensive treatment of one of the central issues in environmental management. Informed by an evolutionary political economy perspective, this text draws on a worldwide range of case studies and examples.

A weekly review of politics, literature, theology, and art.

The Spectator Academic Press

Footprints is a captivating story about intellectual property (IP). It speaks to its role in society, trade, industry, and economy and expounds on the actual meaning of IP. The book lays a solid foundation for innovators, entrepreneurs, businesses, and nations to realise their full potential through IP policy, legislation, use and practices. McLean Sibanda shares his personal story, together with stories and testimonies of fellow travellers, taking us through their journey into the field of IP. He meticulously recounts South Africa's path in transforming the management of IP emanating from publicly financed research and development (R&D), development of critical human capital and other infrastructure to ensure effective IP commercialisation and technology transfer.

Footprints is a timely masterpiece given IP issues in Africa's scramble for Covid-19 vaccines and implementation of the agreement establishing the African Continental Free Trade Area (AfCFTA). The book provides strategies of how African countries can use IP and innovation to develop industries to ensure health security and trading of goods that can benefit from the AfCFTA. Narrated through a series of significant moments, *Footprints* demonstrates the importance of vision, solid foundation, collaboration, champions, and intentional steps, for economic transformation. With glimpses into how countries such as China and Korea used IP to develop their economies, this book makes a compelling case for embracing IP, increased R&D investment, relevant human capital, and appropriate use of IP, in the development of new products and services necessary for knowledge-based and industrialised economies. *Footprints* is a must-read for any academic, aspiring intellectual property scholar, policy maker, economist, development activist, entrepreneur, researcher, innovator, professional, and technology transfer specialist. Intellectual property is everywhere around us and impacts our lives. For entrepreneurs and businesses alike, intellectual property is about value creation, it is the insurance you need for when you succeed. - McLean Sibanda

The Effects of Affirmative Action on the Motivation of Employees at Durban University of Technology

Encyclopaedia Britannica

This book offers a conceptual re-think of how university community engagement functions as a lifelong learning resource for communities. While having a specific focus on the South African context, it has important implications for other universities which are concerned with their communities, and makes a compelling argument for the university as a public good, in spite of current trends towards marketization and commodification of higher education. The book draws on a theoretical framework of capabilities, asset-based community development, and the adult learning concept of dialogue, to propose a model whereby the boundary walls of the university become metaphorically 'porous', so that community members feel free to interact with the university as equal members of society. A historical outline of African universities is provided, as well as an exploration of the evolution of terms for community engagement, service learning and learning cities; and an examination of the policy and practice implications for the ideological model of a porous university.

Nursing Law for Irish Students Cambridge Scholars Publishing

E-learning is becoming increasingly prominent in tertiary education. Rationales for its growth are wide-ranging, complex and contested, including widening access, on-campus pedagogic innovation, enhancement of distance learning, organisational change, knowledge-sharing and revenue generation. This report looks at the practice in 19 tertiary education institutions and is designed to elucidate both good practice and international trends. It is organised in three sections: activities and strategies; pedagogy, technology and organisation; cost efficiency and funding.

Technology Business Incubation Academic Press

The Routledge Handbook of Tourism Experience Management and Marketing offers a comprehensive and thorough inquiry into both

customary and emergent issues of tourism experience and co-creation. Drawing together contributions from 83 authors from 28 countries with varied backgrounds and interdisciplinary interests, the handbook highlights multiple representations and interpretations of the theme. It also integrates a selection of illustrative global case studies to effectively present its chapter contents. Tourism experience drives the contemporary tourist's behavior as they travel in pursuit of experiencing unique and

unusual destinations and activities. Creating a memorable and enduring experience is therefore a prerequisite for the all tourism business organizations irrespective of the nature of their products or services. This handbook focuses on conceptualizing, designing, staging, managing and marketing paradigms of tourism experiences from both supply and demand perspectives. It sheds substantial light on the contemporary theories, practices and

future developments in the arena of experiential tourism management and marketing. Encompassing the latest thinking and research themes, this will be an essential reference for upper-level students, researchers, academics and industry practitioners of hospitality as well as those of tourism, gastronomy, management, marketing, consumer behavior, cultural studies, development studies and international business, encouraging dialogue across disciplinary boundaries.
