## MACK EFRAIN

The Oxford Handbook of Material Culture Studies Histoire Géographie EMC 6e cycle 3  
 Liturgical Subjects examines the history of the self in the Byzantine Empire, challenging narratives of Christian subjectivity that focus only on classical antiquity and the Western Middle Ages. As Derek Krueger demonstrates, Orthodox Christian interior life was profoundly shaped by patterns of worship introduced and disseminated by Byzantine clergy. Hymns, prayers, and sermons transmitted complex emotional responses to biblical stories, particularly during Lent. Religious services and religious art taught congregants who they were in relation to God and each other. Focusing on Christian practice in Constantinople from the sixth to eleventh centuries, Krueger charts the impact of the liturgical calendar, the eucharistic rite, hymns for vigils and festivals, and scenes from the life of Christ on the making of Christian selves. Exploring the verse of great Byzantine liturgical poets, including Romanos the Melodist, Andrew of Crete, Theodore the Stoudite, and Symeon the New Theologian, he demonstrates how their compositions offered templates for Christian self-regard and self-criticism, defining the Christian "I." Cantors, choirs, and congregations sang in the first person singular expressing guilt and repentance, while prayers and sermons defined the collective identity of the Christian community as sinners in need of salvation. By examining the way models of selfhood were formed, performed, and transmitted in the Byzantine Empire, Liturgical Subjects adds a vital dimension to the history of the self in Western culture.  
*Heat Transfer to Mercury* OUP Oxford  
 This two-part text fills what has often been a void in the first-year graduate physics curriculum. Through its examination of particles and continua, it supplies a lucid and self-contained account of classical mechanics — which in turn provides a natural framework for introducing many of the advanced mathematical concepts in physics. The text opens with Newton's laws of motion and systematically develops the dynamics of classical particles, with chapters on basic principles, rotating coordinate systems, lagrangian formalism, small oscillations, dynamics of rigid bodies, and hamiltonian formalism, including a brief discussion of the transition to quantum mechanics. This part of the book also considers examples of the limiting behavior of many particles, facilitating the eventual transition to a continuous medium. The second part deals with classical continua, including chapters on string membranes, sound waves, surface waves on nonviscous fluids, heat conduction, viscous fluids, and elastic media. Each of these self-contained chapters provides the relevant physical

background and develops the appropriate mathematical techniques, and problems of varying difficulty appear throughout the text.

 The Oligarchy that usurped power in the USA, against America's revolutionary heritage, that has now destroyed the economy: What is it? Anton Chaitkin's Treason in America is the original, authoritative inquiry into this criminal apparatus, the British Empire and its arms in Wall Street, Boston and the South.

 As portals to the supernatural realm that creates and animates the universe, caves have always been held sacred by the peoples of Mesoamerica. From ancient times to the present, Mesoamericans have made pilgrimages to caves for ceremonies ranging from rituals of passage to petitions for rain and a plentiful harvest. So important were caves to the pre-Hispanic peoples that they are mentioned in Maya hieroglyphic writing and portrayed in the Central Mexican and Oaxacan pictorial codices. Many ancient

settlements were located in proximity to caves. This volume gathers papers from twenty prominent Mesoamerican archaeologists, linguists, and ethnographers to present a state-of-the-art survey of ritual cave use in Mesoamerica from Pre-Columbian times to the present. Organized geographically, the book examines cave use in Central Mexico, Oaxaca, and the Maya region. Some reports present detailed site studies, while others offer new theoretical understandings of cave rituals. As a whole, the collection validates cave study as the cutting edge of scientific investigation of indigenous ritual and belief. It confirms that the indigenous religious system of Mesoamerica was and still is much more terrestrially focused that has been generally appreciated.

The tragic story of Clisson and Eugenie reveals one of history's great leaders to also be an accomplished writer of fiction. Written in an eloquently Romantic style true to its period, the story offers the reader a fascinating insight into how the young Napoleon viewed love, women and military life.

illustrated. 1860 edition. Excerpt: ... the first-born among the believers in the resurrection of Jesus, may also be explained the divergency, that according to the narrative of the fourth gospel alone, Wary Magdalene hastens back to the two disciples before she has yet seen an angel. For had she beforehand witnessed an angelic appearance, which she would not any more than the women in Matthew have mistrusted, she would have been the first believer, and would have won the precedence of John in this respect: but this is avoided by representing her as coming to the two disciples immediately after perceiving the emptiness of the grave, and under the disquietude excited in her by this circumstance. This presupposition serves also to explain why the fourth gospel makes the women returning from the grave go, not to the disciples in general, but only to Peter and John. As, namely, the intelligence which, according to the original narrative, was brought to all the disciples, occasioned, according to Luke, only Peter to go to the grave, and as moreover, according to Mark (v. 7), the message of the women was destined more especially for Peter: the idea might easily be formed, that the news came to this disciple alone, with whom the object of the fourth evangelist would then require that he should associate John. Only after the two disciples had come to the grave, and his John had attained faith, could the author of the fourth gospel introduce the appearances of the angel and of Jesus himself, which were said to have been granted to the women. That instead of these collectively he names only Mary Magdalene--although, as has been earlier remarked, he xx. 2. presupposes at least a subsequent meeting between her and other women--this might certainly, under other circumstances, be regarded...

*Foreign Bodies* The Entomological Society of Latvia

This book covers research topics in bilingual education, language policies, language contact, identity of bilingual speakers, early bilingualism, heritage languages, and more, and provides an overview of current theory, research and practice in the field of bilingualism. Each chapter is written by a specialist in the field. Part I focuses on the numerous and heterogeneous relations between languages as well as the implications arising from bilingual speech processing. In Part II, a series of contextualized studies on bilingual classrooms are presented, with diverse research designs applied in different educational settings being a key feature of these studies. Part III bridges theory and practice by offering an insight into mono- and multilingual school settings showcasing examples of educational institutions where bilingualism successfully soared and depicts the needs related to language education.

*Emblems of Mortality* Vintage

Millions of Jews, Christians, and Muslims believe that a 2,500-year-old prophecy is about to be fulfilled: a global, apocalyptic jihad of many nations against the tiny state of Israel, whose

recent re-emergence in its traditional land has sparked unrelenting rage and attack. Repeated resolutions passed in the United Nations reflect world-wide and nearly unanimous hostility against the so-called Zionist entity even to the point of denying its right to exist. Most news media and political analysts seem unaware of the ancient prophecy that not only predicts this apocalyptic war, but also, amazingly, how this prophecy by Ezekiel (chapters 36-44) provides the scenario for numerous best-selling books in both the English-speaking and Muslim worlds! These best sellers not only describe this great conflagration, but actually also motivate their readers to prepare for it! The Prophecy That Is Shaping History represents a major advance in research and scholarship in examining the historical and contemporary impact of Ezekiel's prophecy on world events. This academic monograph also offers a wealth of new evidence in tracing the identities, origins, and ultimate destinies of the key nations of Ezekiel's prophecy who are seen to participate in what millions believe will be the most horrific battle the world will ever witness.

*Farewell to Shulamit* Hachette Education

"Like man, woman is a human being." When *The Second Sex* was first published in Paris in 1949—groundbreaking, risqué, brilliantly written and strikingly modern—it provoked both outrage and inspiration. *The Independent Woman* contains three key chapters of Beauvoir's masterwork, which illuminate the feminine condition and identify practical social reforms for gender equality. It captures the essence of the spirited manifesto that switched on light bulbs in the heads of a generation of women and continues to exert profound influence on feminists today.

*Supplement to the Bibliography of Algeria* ANU E Press

*The Song of Songs*, a lyric cycle of love scenes without a narrative plot, has often been considered as the Bible's most beautiful and enigmatic book. The present study questions the still dominant exegetical convention that merges all of the Song's voices into the dialogue of a single couple, its composite heroine Shulamit being a projection screen for norms of womanhood. An alternative socio-spatial reading, starting with the Hebrew text's strophic patterns and its references to historical realia, explores the poem's artful alternation between courtly, urban, rural, and pastoral scenes with their distinct characters. The literary construction of social difference juxtaposes class-specific patterns of consumption, mobility, emotion, power structures, and gender relations. This new image of the cycle as a detailed poetic frieze of ancient society eventually leads to a precise hypothesis concerning its literary and religious context in the Hellenistic age, as well as its geographical origins in the multiethnic borderland east of the Jordan. In a Jewish echo of anthropological skepticism, the poem emphasizes the plurality and relativity of the human condition while praising the communicative powers of pleasure, fantasy, and multifarious Eros.

Written by an international team of experts, the Handbook makes accessible a full range of theoretical and applied approaches to the study of material culture, and the place of materiality in social theory, presenting current thinking about material culture from the fields of archaeology, anthropology, geography, and science and technology studies.

*The Book of Ser Marco Polo, the Venetian, Concerning the Kingdoms and Marvels of the East* Sagwan Press

From the 18th century, Oceania became the principal laboratory of raciology for scholars, voyagers, and colonizers alike. By juxtaposing encounters and theory, this magisterial book explores the semantics of human difference in all its emotional, intellectual, religious, and practical dimensions. The argument developed is subtle, engrossing, and gives the paradigm of 'race' its full use value. *Foreign Bodies* is a model of analysis and erudition from which historians of science and everyone interested in intercultural relations will greatly profit.

*The Independent Woman* Copyright Office, Library of Congress

This is a study of how and why the Byzantine Empire lost many of its most valuable provinces to Islamic (Arab) conquerors in the seventh century, provinces which included Syria, Palestine, Mesopotamia, and Armenia. It investigates conditions on the eve of those conquests, mistakes in Byzantine policy toward the Arabs, the course of the military campaigns, and the problem of local official and civilian collaboration with the Muslims. It also seeks to explain how, after terrible losses, the Byzantine government achieved some intellectual rationalisation of its disasters and began the complex process of transforming and adapting its fiscal and military institutions and political controls in order to prevent further disintegration.
