A modernist urban novel in the tradition of James Joyce, Adam Buenosayres is a tour-de-force that does for Buenos Aires what Carlos Fuentes did for Mexico City or José Lezama Lima did for Havana - chronicles a city teeming with life in all its clever and crass, rude and intelligent forms. Employing a range of literary

styles and a variety of voices, Leopoldo Marechal parodies and celebrates Argentina's most brilliant literary and artistic generation, the martinfierristas of the 1920s, among them Jorge Luis Borges. First published in 1948 during the polarizing reign of Juan Perón, the novel was hailed by Julio Cortázar as an extraordinary event in twentieth-century Argentine literature. Set over the course of three break-neck days, Adam Buenosayres follows the protagonist through an apparent metaphysical awakening, a battle for his soul fought by angels and demons, and a descent through a place resembling a comic version of Dante's hell. Presenting both a breathtaking translation and thorough explanatory notes, Norman Cheadle captures the limitless language of Marechal's original and guides the reader along an unmatched journey through the culture of Buenos Aires. This first-ever English translation brings to light Marechal's masterwork with an introduction outlining the novel's importance in various contexts - Argentine, Latin American, and world literature - and with notes illuminating its literary, cultural, and historical references. A salient feature of the Argentine canon, Adam Buenosayres is both a path-breaking novel and a key text for understanding Argentina's cultural and political history.

Stable Isotope Geochemistry is an introduction to the use of

stable isotopes in the fields of geoscience. It is subdivided into three parts: - theoretical and experimental principles; - fractionation mechanisms of light elements; - the natural variations of geologically important reservoirs. In this updated 4th edition many of the chapters have been expanded, especially those on techniques and environmental aspects. The main focus is on recent results and new developments. For students and scientists alike the book will be a primary reference with regard to how and where stable isotopes can be used to solve geological problems.

In this fascinating collection of essays, an international group of scholars explores the sonic consequences of transcultural contact in the early modern period. They examine how cultural configurations of sound impacted communication, comprehension, and the categorisation of people. Addressing questions of identity, difference, sound, and subjectivity in global early modernity, these authors share the conviction that the body itself is the most intimate of contact zones, and that the culturally contingent systems by which sounds made sense could be foreign to early modern listeners and to present day scholars. Drawing on a global range of archival evidence—from New France and New Spain, to the slave ships of the Middle Passage, to China, Europe, and the Mediterranean court environment—this collection challenges the privileged position of European acoustical practices within the discipline of global-historical musicology. The discussion of Black and non-European experiences demonstrates how the production of 'the canon' in the cosmopolitan centres of colonial empires was underpinned by

processes of human exploitation and extraction of resources. As such, this text is a timely response to calls within the discipline to decolonise music history and to contextualise the canonical works of the European past. This volume is accessible to a wide and interdisciplinary audience, not only within musicology, but also to those interested in early modern global history, sound studies, race, and slavery.

Cuando Andrea tenía doce años, le diagnosticaron diabetes tipo 1. Agujas, pinchazos, revisiones, control con la comida... Pero lo primero que ella le preguntó a la doctora fue: «¿Podré seguir jugando al fútbol?». Pudo, tanto que se convirtió en deportista profesional de fama internacional. Esta es su historia, la historia de cómo una niña que tuvo que cargar con una compañera de viaje imprevista se sacudió sus miedos y luchó por sus sueños hasta hacerlos realidad. Con este libro, realista y a la vez optimista y vital, Andrea Pereira saca a la luz vivencias muy personales que a la vez quieren ser un referente, porque son universales.

*The Object of the Atlantic* is a wide-ranging study of the transition from a concern with sovereignty to a concern with things in Iberian Atlantic literature and art produced between 1868 and 1968. Rachel Price uncovers the surprising ways that concrete aesthetics from Cuba, Brazil, and Spain drew not only on global forms of constructivism but also on a history of empire, slavery, and media technologies from the Atlantic world. Analyzing Jose Marti's notebooks, Joaquim de Sousandrade's poetry, Ramiro de Maeztu's essays on things and on slavery, 1920s Cuban literature on economic restructuring, Ferreira Gullar's theory of the "non-object," and neoconcrete art, Price shows that the turn to objects—and from these to new media networks—was rooted in the very philosophies of history that helped form the Atlantic world itself.

*A Comparative History of Literatures in the Iberian Peninsula* is the second comparative history of a new subseries with a regional focus, published by the Coordinating Committee of the International Comparative Literature Association. As its predecessor for East-Central Europe, this two-volume history distances itself from traditional histories built around periods and movements, and explores, from a comparative viewpoint, a space considered to be a powerful symbol of inter-literary relations. Both the geographical pertinence and its symbolic condition are obviously discussed, when not even contested. Written by an international team of researchers who are specialists in the field, this history is the first attempt at applying a comparative approach to the plurilingual and multicultural literatures in the Iberian Peninsula. The aim of comprehensiveness is abandoned in favor of a diverse and extensive array of key issues for a comparative agenda. *A Comparative History of Literatures in the Iberian Peninsula* undermines the primacy claimed for national and linguistic boundaries, and provides a geo-cultural account of literary inter-systems which cannot otherwise be explained.

*Global Change and the Earth System* describes what is known about the Earth system and the impact of changes caused by humans. It considers the consequences of these changes with respect to the stability of the Earth system and the well-being of humankind; as well as exploring future paths towards Earth-system science in support of global sustainability. The results presented here are based on 10 years of research on global change by many of the world's most eminent scholars. This

valuable volume achieves a new level of integration and interdisciplinarity in treating global change.

A New York Times bestseller 'A sensation ... a rollicking tale well told' - The Times At the heart of *Born to Run* lies a mysterious tribe of Mexican Indians, the Tarahumara, who live quietly in canyons and are reputed to be the best distance runners in the world; in 1993, one of them, aged 57, came first in a prestigious 100-mile race wearing a toga and sandals. A small group of the world's top ultra-runners (and the awe-inspiring author) make the treacherous journey into the canyons to try to learn the tribe's secrets and then take them on over a course 50 miles long. With incredible energy and smart observation, McDougall tells this story while asking what the secrets are to being an incredible runner. Travelling to labs at Harvard, Nike, and elsewhere, he comes across an incredible cast of characters, including the woman who recently broke the world record for 100 miles and for her encore ran a 2:50 marathon in a bikini, pausing to down a beer at the 20 mile mark.

'She thought that it was precisely when things get uncomfortable or can't be shown that something interesting comes to light. That is the point of no return, the point that must be reached, the point you reach after crossing the border of what has already been said, what has already been seen. It's cold out there.' This hybrid novel--part research notes, part fictionalised diary, and part travelogue--uses the stories of polar exploration to make sense of the protagonist's own concerns as she comes of age as an artist, a daughter, and a sister to an autistic brother. Conceptual and emotionally compelling, it advances fearlessly into the frozen emotional lacunae of difficult family relationships. Deserving winner of multiple awards upon its Catalan and Spanish publication, *Brother in Ice* is a richly rewarding journey into the unknown.
