*Nine Lives: A
Self-Help Book
for Amputees*
Lulu.com

An interdisciplinary team of experts addresses all aspects of rehabilitation for amputees, from assessments and psychosocial considerations through evidence-based treatment approaches and more. The New Edition is

updated to incorporate the latest advances in this field, and to reflect the fact that amputees now receive rehabilitation therapy in a variety of settings.

Alive & Whole Amputation

Melanie Hansen
The main objective in the rehabilitation of people following amputation is to restore or improve their functioning, which includes their return to work. Full-time employment

leads to beneficial health effects and being healthy leads to increased chances of full-time employment (Ross and Mirowsky 1995). Employment of disabled people enhances their self-esteem and reduces social isolation (Dougherty 1999). The importance of returning to work for people following amputation the- fore has to be considered. Perhaps the

first article about reemployment and problems people may have at work after amputation was published in 1955 (Boynton 1955). In later years, there have been sporadic studies on this topic. Greater interest and more studies about returning to work and problems people have at work following amputation arose in the 1990s and has continued in recent years (Burger and

Marinc ?ek 2007). These studies were conducted in different countries on all the five continents, the greatest number being carried out in Europe, mainly in the Netherlands and the UK (Burger and Marinc ?ek 2007). Owing to the different functions of our lower and upper limbs, people with lower limb amputations have different activity limitations and participation restrictions compared to

people with upper limb amputations. Both have problems with driving and carrying objects. People with lower limb amputations also have problems standing, walking, running, kicking, turning and stamping, whereas people with upper limb amputations have problems grasping, lifting, pushing, pulling, writing, typing, and pounding

(Giridhar et al. 2001). Izzy, Willy-Nilly Springer Science & Business Media Tells how the author's life changed following a car accident and how he believes his relationship with God helped him to recover to the point that he was able to complete the Hawaiian Ironman Triathlon. Psychoprosthetics Harper 'It is not often I can use "accessible" and "phenomenology" in the

same sentence, but reading the new book, Interpretative Phenomenological Analysis...certainly provides me the occasion to do so. I can say this because these authors provide an engaging and clear introduction to a relatively new analytical approach' - The Weekly Qualitative Report Interpretative phenomenological analysis (IPA) is an increasingly popular approach to qualitative

inquiry. This handy text covers its theoretical foundations and provides a detailed guide to conducting IPA research. Extended worked examples from the authors' own studies in health, sexuality, psychological distress and identity illustrate the breadth and depth of IPA research. Each of the chapters also offers a guide to other good exemplars of IPA research in the designated

area. The final section of the book considers how IPA connects with other contemporary qualitative approaches like discourse and narrative analysis and how it addresses issues to do with validity. The book is written in an accessible style and will be extremely useful to students and researchers in psychology and related disciplines in the health and social sciences. *Atlas of Amputations*

and Limb Deficiencies
 Simon and Schuster
 The masterpiece of the German experience during World War I, considered by many the greatest war novel of all time—with an Oscar-winning film adaptation now streaming on Netflix. “[Erich Maria Remarque] is a craftsman of unquestionably first rank.”—The New York Times Book Review I am young, I am twenty years old; yet I know nothing of life but despair, death, fear, and fatuous superficiality cast over an abyss of sorrow. . . . This is the testament of Paul Bäumer, who enlists with his classmates in the German army during World War I. They become soldiers with youthful enthusiasm. But the world of duty, culture, and progress they had been taught breaks in pieces under the first bombardment in the trenches. Through years of vivid horror, Paul holds fast to a single vow: to fight against the principle of hate that meaninglessly pits young men of the same generation but different uniforms against one another . . . if only he can come out of the war alive. *Life After Limb Loss* Random House
 Psychoprosthetics is defined as the study of psychological aspects of prosthetic use and of

rehabilitative processes in those conditions that require the use of prosthetic devices. Psychoprosthetics: State of the Knowledge brings together, into one easily accessible volume, the most recent and exciting research and knowledge in this new field On My Own Two Feet Springer Science & Business Media Have you undergone a below the knee

amputation (BKA) or an above the knee amputation (AKA)? ★ ★ Do you know anyone who has? ★ ★ This book is filled with valuable information, strategies and tips for BKA and AKA amputees, as well as for upper limb amputees, their family members and caregivers. ★ ★ You will gain insight, advice, hope, encouragement, understanding, and a bit of humor from someone who has gone

through it. ★ ★ This is a story of challenge and hope - not merely roadblocks or tragedy. ★ ★ You will have "a leg to stand on" - even when life has thrown you a curveball. *A History of Limb Amputation* Rodale In this compelling memoir, author Kevin S. Garrison takes you on his journey from undergoing a Syme amputation to a life of service, helping others

deal with the effects of physical disability as a Certified and Licensed Prosthetist. In 1969, teenager Kevin Garrison was diagnosed with cancer. Not long after that, his doctor informed him he needed a Syme amputation, and he would lose his right foot. At that moment, Garrison knew change was upon him forever. In this true story of survival, Garrison shares his incredible

journey facing uncertainties and anger, struggling with emotional and physical pain, and fighting fear as he moves further away from his usual routine and into the world of the permanently disabled. This memoir is one of those inspirational stories that will help amputees, their family members, and healthcare providers learn how to let go of anger. Exploring his most profound,

most personal thoughts, Garrison illustrates a descriptive and sometimes shockingly funny journey as he discovers what it's like to undergo amputee rehabilitation and that rebuilding your life is possible. In its third edition, *It's Just a Matter of Balance* will show amputees how to overcome physical disabilities and deal with the effects of physical disability and

the emotional pain that comes with it. Garrison draws from other inspirational stories of survival during his time as a Certified and Licensed Prosthetist. In addition, he teaches amputees how to overcome despair as he shows his struggles to rebuild his life. The American Academy of Orthotists and Prosthetists and The Veterans and Active-Duty Military Psychotherapy Treatment	Planner recommend the book. Kirkus Reviews called the book, "A heartwarming debut memoir about finding meaning in the face of loss...His sly sense of humor, meanwhile, provides a good balance to his heavier material." Garrison knows firsthand that getting advice on dealing with amputee rehabilitation is not easy. However, his memoir, It's Just a Matter of Balance, will help you	see how your story can help others. You'll see through Garrison's eyes that rebuilding your life is not only possible but that you can still live a life that involves serving others. The book chronicles the events leading to Garrison's below-the-knee amputation, his recovery, and the physiological adjustment needed to adopt a prosthetic limb. Additionally, he poignantly
---	--	--

details his true feelings, triumphs, setbacks, and positive choices as he learns to focus on his abilities instead of his disabilities and overcome challenges. It's Just a Matter of Balance shares an eye-opening glimpse into the inspiring life of Garrison, who demonstrates to others that with genuine acceptance of our fate and dedication to anger management, we can live a whole life with significant

meaning and purpose. AMPossible Lippincott Williams & Wilkins This work offers a glimpse into the life of a new amputee and walks readers through the first minutes, hours, and days of living with limb loss. Jeffrey A. Mangus, a below the knee amputee, also offers insight and encouragement for the long haul - providing readers with all they need to know to get

back to living a full life. The Promise of Assistive Technology to Enhance Activity and Work Participation Penguin While trying to drive to her grandmother's in Ontario, Canada, young Clara becomes stranded in a snowstorm. She finds herself and her year-old daughter, Penny, on the doorstep of an Amish farmhouse. The entire Amish community steps in to help the

young mother and daughter. Discover how their help affects Clara's journey home. "This is a heart-warming story of how a God-loving community helps Clara, a troubled teenage mom, find a solution to the problematic issues in her life." - Joanne M., Sequim, WA "This enjoyable story of a young woman's encounter with the Amish community takes the reader into the lives of

the characters in a way that makes one care about them. Many insights into the Amish way of life were included, and the way their devotion to God and family was portrayed makes it easy to understand how lives could be changed by embracing those aspects of the culture. That transformation was inspiring and encouraging." - Terri R., Everett, WA "In this hard-to-put-down emotional

drama, a young wife and mother's struggle is provided caring support by an unfamiliar Amish community. It's an uplifting story of rescue, redemption, and repentance. Ms. Linn, skillfully weaves in the fragrance of teas and herbal remedies, the vision of natural decorations, and the tastes of home baked goods in a simple Amish Christmas

backdrop. A delightful read." - Dee Malchow, author of *Alive & Whole*, *Amputation: Emotional Recovery*. Crystal Linn is a multi-published author and an award-winning poet. Since 2001 she has taught creative writing classes. Ms. Linn lives on the Olympic Peninsula in NW Washington State where she enjoys reading mysteries, writing poetry, hiking and sailing with

friends and family. Clara's Christmas Journey *Alive & Whole Amputation* "With clarity, wit and an accessible style, limb salvage specialist Dee Malchow (herself a high-functioning lower extremity amputee) provides a "how-to" guide for patients (and their families) confronted by the possibility -- or the established fact -- of limb loss. As an amputation

surgeon myself for the past 40 years, how I wish I had had available this handbook to help educate, calm, reassure and (believe it or not) even amuse my amputation patients! Kudos to Dee Malchow for providing absolutely essential insight into this terribly fraught clinical scenario." Kaj Johansen MD, PhD, FACS, Chief of Vascular Surgery at Swedish Medical Center, Seattle Losing

a limb will impact every aspect of a persons' life. This book describes the emotional process that a person experiences in adjusting to limb loss. It's based on the author's own story and professional experience yet includes input for many others living with an amputation. A person's attitude and behavior will either promote or impede progress. An amputation can feel like a disaster or a

nuisance. Most days it feels somewhere in between. Dee Malchow, MN, RN, is an amputation nurse specialist. She experienced a right below knee amputation at age 19 from a boating accident. She received her Bachelor of Science and Masters Degree in Nursing from the University of Washington. Over the past 50 years Dee has interacted with over 3000 amputees

through her job at a Trauma Center, sports (skiing & soccer), mission work (Sierra Leone, W. Africa), and prosthetic research. Dee is married to Jim Malchow, and lives in Shoreline, Washington. They have two grown married children who have provided them with eight delightful grandchildren. "I have just read this book with great enjoyment and interest. It brought back a flood of great

memories, as I was a colleague of Dee throughout her time at Harborview. She helped me perfect a diurnal pain medication regime which kept patients asleep at night and awake and interacting in the daytime. I also came to realize she was spending extra time counseling new amputee patients at night. We conceived the idea of an amputee clinic and support group with her as the leader.

The hospital administration soon realized the value of Dee's program and 'the rest is history...' as they say. Everyone who deals in any way with patients who have incurred a disfiguring and/or disabling injury will find reading this book time very well spent." Sig T. Hansen Jr. MD, Professor Emeritus, University of Washington, School of Medicine; Director of Sigvard T. Hansen Foot & Ankle

Institute, Harborview Medical Center, Seattle "The book conveys amazing information and has great value." Douglas G. Smith, MD, Orthopedic trauma and amputation surgeon at Harborview Medical Center, Seattle; Former Medical Director for Amputee Coalition of America. "Your book is very thorough with the mindset of an amputee, and provided food

for thought that I would have never even considered unless I read this. In addition, I loved that you had backup quotes from other amputees recounting their experiences-it makes for good ethos/credibility and solidifies your content REALLY well!" Hannah Cvancara, Below-knee amputation from birth deformity, pursuing nursing career. "Dee's

book is, insightful, comprehensive and encouraging; a fantastic source of information and hope for amputees and those who support them. Sharing her experiences as a nurse, and as an amputee herself, Dee illustrates that with the right perspective the loss of a limb is a challenging transition, but is not the end." Dan Broome, Above knee amputation from trauma, Project

Manager for Grading & Demolition Co. **A Little Life** Createspace Independent Publishing Platform Losing a limb will impact every aspect of a person's life. This book describes the emotional process that a person may experience in adjusting to limb loss. Based on the author's own story and professional experience, it also includes input from many other amputees. Dee Malchow is an amputation

nurse specialist who underwent a below knee amputation at age 19 from a boating accident. Since then Dee has interacted with over 3000 amputees through her job, skiing, soccer, mission work in Sierra Leone, and prosthetic research. She received her Bachelor's and Master's Degree in Nursing at the University of Washington. Dee is married to Jim Malchow and

lives north of Seattle, Washington. They have two grown married children who have provided them with eight delightful grandchildren. See more at <http://deemalchow.weebly.com> "Dee Malchow, RN writes with wisdom, emotion and incredible insight. Her book, based on her own experience, and in providing care and support to thousands of others with limb loss, provides help

and guidance to those with amputation. As an Orthopaedic Surgeon, who has worked closely with Dee over the years, I continue to learn from her about how individuals cope, heal, struggle, and succeed. She has certainly taught me more than anyone else about being 'Alive and Whole.'" Douglas G Smith, MD, Professor of Orthopaedic Surgery, University of Washington [Float Plan](#)

Simon and Schuster
Two battle buddies. One fateful deployment. Two vastly different sets of wounds. One friendship changed forever. A childhood in foster care taught Carey Everett to hold tight to what he has. Enlisting in the Marines gave him purpose, but a life-threatening injury ended his career—and took his leg. Now fully recovered, Carey's happier than

he's ever been. He has a fulfilling job, a chosen family and, best of all, a cherished friendship with Jase DeSantis, the platoon medic who saved his life. Despite Jase's heroism in combat, he's haunted by his actions overseas. Playing music with his band keeps the demons at bay, but it's a battle he's starting to lose. After a week of sun and fun in San Diego, Jase and Carey's connection takes an

unexpected turn. With change comes a new set of challenges. For Jase, it means letting someone else into his deepest pain. For Carey, it's realizing love doesn't always equal loss. In order to make their relationship work, they'll have to come to terms with their pasts...
...or risk walking away from each other for good.
All Quiet on the Western Front
Random House
Covering both

upper and lower extremity prosthetics, this book provides the information clinicians need to manage a range of prosthetic patients, and their disorders. The authors cover practical solutions to everyday problems that clinicians encounter, from early prosthetic management to issues facing the more advanced prosthetic user. The text is broken down into four

sections encompassing the range of subjects that confront practitioners, including *Early Management; Rehabilitation of Patients with Lower Limb Amputation; Rehabilitation of Patients with Upper Limb Amputations; and Beyond the Basics*, which includes special considerations for children and futuristic concepts. [Yoga for Amputees](#) SAGE One moment can change a life forever.

Fifteen-year-old Izzy has it all -- a loving family, terrific friends, a place on the cheerleading squad. But her comfortable world crumbles when a date with a senior ends in a car crash and she loses her right leg. Suddenly nothing is the same. The simplest tasks become enormous challenges. Her friends don't seem to know how to act around her. Her family is supportive, but they don't really want to

deal with how much she's hurting. Then Rosamunde extends a prickly offer of friendship. Rosamunde definitely isn't the kind of girl Izzy would have been friends with in her old life. But Rosamunde may be the only person who can help Izzy face her new one.

Lost in a Moment

Simon and Schuster

How do you move on from an irreplaceable loss? In a poignant debut, a

sixteen-year-old boy must learn to swim against an undercurrent of grief—or be swept away by it. Otis and Meg were inseparable until her family abruptly moved away after the terrible accident that left Otis's little brother dead and both of their families changed forever. Since then, it's been three years of radio silence, during which time Otis has become the unlikely protégé of eighteen-year-

old Dara—part drill sergeant, part friend—who's hell-bent on transforming Otis into the Olympic swimmer she can no longer be. But when Otis learns that Meg is coming back to town, he must face some difficult truths about the girl he's never forgotten and the brother he's never stopped grieving. As it becomes achingly clear that he and Meg are not the same people they were, Otis

must decide what to hold on to and what to leave behind. Quietly affecting, this compulsively readable debut novel captures all the confusion, heartbreak, and fragile hope of three teens struggling to accept profound absences in their lives.

Lower Extremity Amputation

Tyndale House Publishers, Inc.

On Sunday April 27, 2003, 27-year old Aron Ralston set off for a

day's hiking in the Utah canyons. Dressed in a t-shirt and shorts, Ralston, a seasoned climber, figured he'd hike for a few hours and then head off to work. 40 miles from the nearest paved road, he found himself on top of an 800-pound boulder. As he slid down and off of the boulder it shifted, trapping his right hand against the canyon wall. No one knew where he was; he had little

water; he wasn't dressed correctly; and the boulder wasn't going anywhere. He remained trapped for five days in the canyon: hypothermic at night, dehydrated and hallucinating by day. Finally, he faced the most terrible decision of his life: braking the bones in his wrist by snapping them against the boulder, he hacked through the skin, and finally succeeded in amputating

his right hand and wrist. The ordeal, however, was only beginning. He still faced a 60-foot rappell to freedom, and a walk of several hours back to his car - along the way, he miraculously met a family of hikers, and with his arms tourniqued, and blood-loss almost critical, they heard above them the whir of helicopter blades; just in time, Aron was rescued and rushed to hospital. Since that day, Aron has had a

remarkable recovery. He is back out on the mountains, with an artificial limb; he speaks to select groups on his ordeal and rescue; and amazingly, he is upbeat, positive, and an inspiration to all who meet him. This is the account of those five days, of the years that led up to them, and where he goes from here. It is narrative non-fiction at its most compelling. Routledge

Now in one convenient volume, Atlas of Amputations and Limb Deficiencies: Surgical, Prosthetic, and Rehabilitation Principles, Fifth Edition, remains the definitive reference on the surgical and prosthetic management of acquired and congenital limb loss. Developed in partnership with the American Academy of Orthopaedic Surgeons (AAOS) and edited by Joseph Ivan

Krajbich, MD, FRCS(C), Michael S. Pinzur, MD, FAAOS, COL Benjamin K. Potter, MD, FAAOS, FACS, and Phillip M. Stevens, MEd, CPO, FAAOP, it discusses the most recent advances and future developments in prosthetic technology with in-depth treatment and management recommendations for adult and pediatric conditions. With coverage of every aspect of this complex field from recognized experts in

amputation surgery, rehabilitation, and prosthetics, it is an invaluable resource for surgeons, physicians, prosthetists, physiatrists, therapists, and all others with an interest in this field. Phantom Limbs Rowman & Littlefield The first ever picture book addressing how a disabled child might want to be spoken to. What happened to you? Was it a shark? A

burglar? A lion? Did it fall off? Every time Joe goes out the questions are the same . . . what happened to his leg? But is this even a question Joe has to answer? A groundbreaking, funny story that helps children understand what it might feel like to be seen as different.' A revolutionary book on disability.' Inclusive Storytime' Catc hpole's beautifully judged, child-friendly words

ably evoke the fatigue and wariness of repeatedly being asked the same question rather than simply being accepted and allowed to play, while George's warm images amplify the delight of shared imagination.' The Guardian 'Wonderful, delightful and important. [...] Not only will it help nondisabled adults and children understand what it is like to be singled out for being

different, but it will empower disabled children and help them realise they don't have to justify themselves to people they don't know.' Jen Campbell, bestselling author of Franklin's Flying Bookshop 'With beautifully characterful illustrations and plenty of calming white space, it exudes gentle energy and humour to appeal to every child. This is a stunningly clever book.'

BookTrust 'The beauty of What Happened to You? is its focus on empathy... a brilliant book to open up the conversation with pre-school kids.' Disability Arts Online 'A groundbreaking picture book reflecting the world of a visibly disabled child... a funny and very enjoyable read that will nevertheless perform an urgently needed task and generate very useful discussion at home and

school.'	to life after	been, affected
