This original and "meticulously researched retelling of history's most infamous voyage" (Denise Kiernan, New York Times bestselling author) uses the sinking of the Titanic as a prism through which to examine the end of the Edwardian era and the seismic shift modernity brought to the Western

world. "While there are many Titanic books, this is one readers will consider a favorite" (Voyage). In April 1912, six notable people were among those privileged to experience the height of luxury—first class passage on "the ship of dreams," the RMS Titanic: Lucy Leslie, Countess of Rothes; son of the British Empire Tommy Andrews; American captain of industry John Thayer and his son Jack; Jewish-American immigrant Ida Straus; and American model and movie star Dorothy Gibson. Within a week of setting sail, they were all caught up in the horrifying disaster of the Titanic's sinking, one of the biggest news stories of the century. Today, we can see their stories and the Titanic's voyage as the beginning of the end of the established hierarchy of the Edwardian era. Writing in his signature elegant prose and using previously unpublished sources, deck plans, journal entries, and surviving artifacts, Gareth Russell peers through the portholes of these first-class travelers to immerse us in a time of unprecedented change in British and American history. Through their intertwining lives, he examines social, technological, political, and economic forces such as the nuances of the British class system, the explosion of competition in the shipping trade, the birth of the movie industry, the Irish Home Rule Crisis, and the Jewish-American immigrant experience while also recounting their intimate stories of bravery, tragedy, and selflessness. Lavishly illustrated with color and black and white photographs, this is "a beautiful requiem" (The Wall Street Journal) in which "readers get the story of this particular floating Tower of Babel in riveting detail, and with all the wider context they could want" (Christian Science Monitor).

The Golden Wheel Dream-book and Fortune-teller Harper Collins

The role of media in any society is vital and is closely related to brands and consumption especially in a vibrant 21st century Asian city. Hong Kong with its free-market economy and urban bustle is a perfect place to observe this in action. But Hong Kong is also deeply conservative in many ways especially with regard to family values, and the presence of overtly sexualized images in advertising sits uncomfortably with the values of modesty and traditional sexual mores that exist there. Young girls are also discovering their identities like any other groups of girls in the world, and often this journey will not be easy. This book deals with media and the extent to which media representations influence girls in Hong Kong and how they are affected by this ubiquitous presence. Through the quantitative and qualitative studies, readers could examine and understand how tween girls and teen girls in Hong Kong interact with the media and how they interpret the messages from the media. The observations found in the studies are also valuable to parents, educators, and communication scholars to better understand the influence of media on the value orientations of girls; and we hope that responsible marketers and educators can use these research findings to communicate with girls in ways which can improve their well-being. Published by City University of Hong Kong Press.

Cognitive-Behavioral Play Therapy (CBPT) incorporates cognitive and behavioral interventions within a play therapy paradigm. It provides a theoretical framework based on cognitive-behavioral principles and integrates these in a developmentally sensitive way. Thus, play as well as verbal and

nonverbal approaches are used in resolving problems. CBPT differs from nondirective play therapy, which avoids any direct discussion of the child's difficulties. A specific problem-solving approach is utilized, which helps the child develop more adaptive thoughts and behaviors. Cognitive-behavioral therapies are based on the premise that cognitions determine how people feel and act, and that faulty cognitions can contribute to psychological disturbance. Cognitive-behavioral therapies focus on identifying maladaptive thoughts, understanding the assumptions behind the thoughts, and learning to correct or counter the irrational ideas that interfere with healthy functioning. Since their development approximately twenty-five years ago, such therapies have traditionally been used with adults and only more recently with adolescents and children. It has commonly been thought that preschool-age and school-age children are too young to understand or correct distortions in their thinking. However, the recent development of CBPT reveals that cognitive strategies can be used effectively with young children if treatments are adapted in order to be developmentally sensitive and attuned to the child's needs. For example, while the methods of cognitive therapy can be communicated to adults directly, these may need to be conveyed to children indirectly, through play activities. In particular, puppets and stuffed animals can be very helpful in modeling the use of cognitive strategies such as countering irrational beliefs and making positive self-statements. CBPT is structured and goal oriented and intervention is directive in nature.

Creating Literacy Communities as Pathways to Student Success offers a model for using literacy as a pathway for secondary students to explore fields from which they are often systematically excluded. In particular, this volume demonstrates how access for young Latina students to STEM related fields can be bolstered through engagement with mentors in writing and reading programs. Written for pre- and in-service teachers, as well as scholars across disciplines, this book aims to re-conceptualize the ways in which writing can best serve ethnically and linguistically diverse students, especially girls.
