GOOD HUANG

Engineering News and American Contract Journal iSmithers Rapra Publishing
 Providing detailed analysis of the thermal comfort assessment of clothing as the basis for developing standards, this book discusses the thermal protective role of clothing as a way of modelling heat transfer from the body, general thermal regulation of humans, and the importance of globally accepted test methods and standards to improve quality. New materials and discoveries in the study of thermal comfort necessitate the need for standard improvements and update. The development of international standards

and the unification of testing methods is of crucial significance to ensure cost reduction and health protection. The book promotes instruments, methods, implementation of unified specifications, and the definition of standards so that a clear quality management system can be established, for both production systems and testing methods. It discusses standards in ergonomics of the thermal environment, clothing thermal characteristics, and subjective assessment of thermal comfort, which allows for systematic control of the measuring methods and the services and final products that are distributed on the global market. This book is aimed at industry professionals, researchers, and advanced students working in textile and clothing engineering, comfort testing, and

ergonomics.

The Metal Worker, Plumber, and Steam Fitter BoD - Books on Demand
 Vols. for May 1929-Dec. 1958 include the Journal of the American Society of Heating and Air-Conditioning Engineers (called in 1929-54 American Society of Heating and Ventilating Engineers) in "Journal Section." The Metal Worker Elsevier Health Sciences
 An exceptional health resource addressing professional practice issues in complementary and alternative medicine
 Clinical Decision Making in Complementary & Alternative Medicine
 differs from other medical texts by introducing a systematic clinical

framework for the practice of complementary and alternative medicine. While comparable titles may explore the use or efficacy of specific complementary and alternative medicine interventions, this indispensable textbook highlights evidence-based interventions, while helping practitioners apply them within a clinical decision making framework. **Clinical Decision Making in Complementary & Alternative Medicine** is a one-of-a-kind health reference for clinicians, students and educators alike. Divided into two parts – theoretical foundation and practical application – the book includes case studies on health conditions such as acne, irritable bowel syndrome and migraine. **Clinical Decision Making in Complementary & Alternative Medicine** is also unique in that it: • focuses on evidence-based practice while also paying attention to the underlying philosophy of complementary and alternative medicine • includes learning objectives and activities to consolidate reader knowledge and help lecturers teaching complementary and alternative medicine students • enables complementary and alternative medicine

practitioners to systematically assess, diagnose, treat and evaluate client-centred health problems in accordance with the established art, science and philosophy of complementary and alternative medicine • guides practitioner thinking, assessment and care – all of which may help increase professional autonomy and accountability, improve client outcomes and quality of care, and reduce errors in decision making
Monthly Catalog of United States Government Publications
 The properties of rubbers are subject to change as a result of ageing, ultimately to the point where the material is no longer capable of fulfilling its function. After a brief introduction to the main environmental and mechanical factors affecting performance, this review focuses on the thermo-oxidative ageing of rubber. It considers the methods of, and the published results from, both natural and accelerated tests. A major section of the report is devoted to exposure and test techniques with discussion of the methods of physical and chemical analysis. An additional indexed section containing several hundred abstracts from the Rapra

Polymer Library database gives useful references for further reading.
