"The supposed extinction of the Indigenous Beothuk people of Newfoundland in the early nineteenth century is a foundational moment in Canadian history. Increasingly under scrutiny, non-Indigenous perceptions of the Beothuk have had especially dire

and far-reaching ramifications for contemporary Indigenous people in Newfoundland and Labrador. Tracing Ochre reassesses popular beliefs about the Beothuk. Placing the group in global context, Fiona Polack and a diverse collection of contributors juxtapose the history of the Beothuk with the experiences of other Indigenous peoples outside of Canada, including those living in former British colonies as diverse as Tasmania, South Africa, and the islands of the Caribbean. Featuring contributions of Indigenous and non-Indigenous thinkers from a wide range of scholarly and community backgrounds, Tracing Ochre aims to definitively shift established perceptions of a people who were among the first to confront European colonialism in North America."-

Packed with resources to help parents make sense of the college application process, conduct a college search, and help guide their child's completion of their college application. The author has included a variety of tools to compare one school to another, keep track of important application deadlines, and track possible scholarship aid. Readers from around the world have praised its value to parents who want to make sense of the college gauntlet without hovering and taking control away from their children. One reviewer has written: Stuart White's new book takes a unique focus on the role of the parent of one of the hundreds of thousands of overachieving high schoolers. Whereas most books are written for parents that micro manage and compel their children into the high achiever stereotype, Prof. White's book centers on a rather

beautiful love story between him and his daughter as she went through the college admission process. Another reader has written: Thank you for sharing your helpful guide to the college application process. I have read many articles and listened to many podcasts regarding the process, yet still learned more from your book; I appreciated your openness and candidness regarding helicopter parenting. I think it's important to include that advice in this book, as most people reading a book like this will lean toward the helicopter side of parenting. The author's side by side journey with his daughter ended with her admission to Yale University.

College Shortcuts is aimed to help bring the consciousness back to college admissions. All day, I hear about competitiveness, stress, anxiety, and frustration and yelling in homes around the world over this. And, frankly, I disagree with this method. What if you could get in consciously....Knowing the universe has your back? What if you surrendered a bit and knew that the world is here to support you, and that having a team can help you and your family get through this in a relaxed and strategic way? In this book, I am going to literally walk you through exactly how to help your child from building a college list, all the way to submitting applications. Just a quick disclaimer, this book is NOT guaranteed to get you into a top college. The truth is that the level of success for children is highly related to their own work, and while I have been an incredible coach and mentor to help mold and shape children's lives around the world, I will tell you that the relationship I have with students is highly dependent on the child itself. This book is written for both adults and teenagers - but I typically write in a style that is directed towards the teenager - so please keep this in mind if you are a parent. Many parents read this book - and I want you to read it first and hand it over to your teenager afterwards. I know that getting into college is a family decision and a very important one - and I take this very seriously.

When they prepare for college, few candidates take the time to acquire the

caliber of recommendation letters they will need to distinguish themselves in a highly competitive applicant pool. This book, which was written by an Ivy League admissions expert, offers detailed advice to write (and get) persuasive letters that highlight the personal, academic and professional strengths the committee expects to see. It also includes 45 successful recommendation letters for students who have distinguished themselves as scholars, leaders, volunteers, athletes, and performers. Finally, there are also persuasive letters that explain extenuating circumstances in a candidate's history (such as disappointing grades and a low SAT score). At top colleges, where the competition is fierce, the quality and depth of a candidate's recommendation letters can make the difference between acceptance and rejection. Whether you are an applicant who needs a persuasive letter of recommendation, or someone who has been asked to write one, this

exceptional book is mandatory reading. [Perfect Phrases for Letters of Recommendation](#) Houghton Mifflin Harcourt
Seasoned classroom veterans, pre-tenured faculty, and neophyte teaching assistants alike will find this book invaluable. HHMI Professor Jo Handelsman and her colleagues at the Wisconsin Program for Scientific Teaching (WPST) have distilled key findings from education, learning, and cognitive psychology and translated them into six chapters of digestible research points and practical classroom examples. The recommendations have been tried and tested in the National Academies Summer Institute on Undergraduate Education in Biology and through the WPST. Scientific Teaching is not a prescription for better teaching. Rather, it encourages the reader to approach teaching in a way that captures the spirit and rigor of scientific research and to contribute to transforming how students learn science.
