The Devil and Miss Prym Harper Collins

The #1 International Bestselling author of *THE ALCHEMIST* reveals in this deeply thoughtful novel that the great wisdom of life is that we can be masters of the things that try to enslave us. "There is nothing wrong with anxiety. Although we cannot control God's time, it is part of the human condition to want to receive the thing we are waiting for as quickly as possible. Or to drive away whatever is causing fear. Anxiety was born in the very same moment as mankind. And since we will never be able to master it, we will have to learn to live with it—just as we have learned to live with storms." 1099. Jerusalem awaits the invasion of the crusaders who have surrounded the city's gates. There, inside the ancient city's walls, women and men of every age and faith have gathered to hear the wisdom of a mysterious man known only as the Copt. As the wise man speaks of loyalty, fear, bravery and solitude, of love, sex, beauty and elegance, his words offer truth and guidance, and reveal the human values that have endured throughout time—then as now, his words reveal who we are, what we fear and what we hope for the future.

"Durst consistently defies expectations."—Publishers Weekly (starred review) From award-winning author Sarah Beth Durst, a standalone epic fantasy set in a brand-new world of towering

mountains and sparkling cities, in which a band of aging warriors have a second chance to defeat dark magic and avenge a haunting loss. Twenty-five years ago, five heroes risked their lives to defeat the bone maker Eklor—a corrupt magician who created an inhuman army using animal bones. But victory came at a tragic price. Only four of the heroes survived. Since then, Kreya, the group's leader, has exiled herself to a remote tower and devoted herself to one purpose: resurrecting her dead husband. But such a task requires both a cache of human bones and a sacrifice—for each day he lives, she will live one less. She'd rather live one year with her husband than a hundred without him, but using human bones for magic is illegal in Vos. The dead are burned—as are any bone workers who violate the law. Yet Kreya knows where she can find the bones she needs: the battlefield where her husband and countless others lost their lives. But defying the laws of the land exposes a terrible possibility. Maybe the dead don't rest in peace after all. Five warriors—one broken, one gone soft, one pursuing a simple life, one stuck in the past, and one who should be dead. Their story should have been finished. But evil doesn't stop just because someone once said, "the end."

Then one day Mikhail finds the narrator and promises to reunite him with his wife. In his attempt to recapture a lost love, the narrator discovers something unexpected about himself. A haunting and redemptive story about obsession, *The Zahir* explores its potential to fulfill our dreams, and to destroy them.

But this newfound rapture is to be cut short, and Elijah sees all of his hopes and dreams irrevocably erased as he is swept into a whirlwind of events that threatens his very existence. Peter Byrne tells the story of Hugh Everett III (1930-1982), whose "many worlds" theory of multiple universes has had a profound impact on physics and philosophy. Using Everett's unpublished papers (recently discovered in his son's basement) and dozens of interviews with his friends, colleagues, and surviving family members, Byrne paints, for the general reader, a detailed portrait of the genius who invented an astonishing way of describing our complex universe from the inside. Everett's mathematical model (called the "universal wave function") treats all possible events as "equally real", and concludes that countless copies of every person and thing exist in all possible configurations spread over an infinity of universes: many worlds. Afflicted by depression and addictions, Everett strove to bring rational order to the professional realms in which he played historically significant roles. In addition to his famous interpretation of quantum mechanics, Everett wrote a classic paper in game theory; created computer algorithms that revolutionized military operations

research; and performed pioneering work in artificial intelligence for top secret government projects. He wrote the original software for targeting cities in a nuclear hot war; and he was one of the first scientists to recognize the danger of nuclear winter. As a Cold Warrior, he designed logical systems that modeled "rational" human and machine behaviors, and yet he was largely oblivious to the emotional damage his irrational personal behavior inflicted upon his family, lovers, and business partners. He died young, but left behind a fascinating record of his life, including correspondence with such philosophically inclined physicists as Niels Bohr, Norbert Wiener, and John Wheeler. These remarkable letters illuminate the long and often bitter struggle to explain the paradox of measurement at the heart of quantum physics. In recent years, Everett's solution to this mysterious problem - the existence of a universe of universes - has gained considerable traction in scientific circles, not as science fiction, but as an explanation of physical reality.

Drawing on work in critical theory, feminism and social history, this book traces the lines of tension shot through Victorian culture by the fear that the social world was being reduced to a display window behind which people, their actions and their convictions were exhibited for the economic appetites of others. Affecting the most basic elements of Victorian life - the vagaries of desire, the rationalisation of social life, the gendering of subjectivity, the power of nostalgia, the fear of mortality, the cyclical routines of the household - the ambivalence generated by commodity culture organizes the thematic concerns of these novels and the society they represent. Taking the commodity as their point of departure, chapters on Thackeray, Gaskell, Dickens, Eliot, Trollope, and the Great Exhibition of 1851 suggest that Victorian novels provide us with graphic and enduring images of the power of commodities to affect the varied activities and beliefs of individual and social experience.
