COHEN LAYLAH

OECD Review of Higher Education, Research and Innovation: Portugal OECD Publishing

Each number includes section: Index to technical articles in current periodical literature (Jan.-Mar. 1907, Index to current technical literature.)

Engineering Hand-book for Civil Engineering Students, Engineers, Overseers, Computors, Draughtsmen, and Other Officers for Technical Guidance in Profession Kluwer Law International B.V.

The Kenya Gazette is an official publication of the government of the Republic of Kenya. It contains notices of new legislation, notices required to be published by law or policy as well as other announcements that are published for general public information. It is published every week, usually on Friday, with occasional releases of special or supplementary editions within the week.

Papers by Command, Cmnd IGI Global

Portugal aims to develop a more innovative, inclusive and productive economy, and to ensure that the ensuing benefits are widely distributed, regionally and socially. This report assesses the extent to which Portugal's higher education, research and innovation system is well configured to help ...

Engineering News and American Railway Journal

The Kenya Gazette is an official publication of the government of the Republic of Kenya. It contains notices of new legislation, notices required to be published by law or policy as well as other announcements that are published for general public information. It is published every week, usually on Friday, with occasional

releases of special or supplementary editions within the week.

Kenya Gazette

Provides a detailed overview of the best business schools across North America, including information on each school's academic program, competitiveness, financial aid, admissions requirements, and social scenes

The Journal of Education

Derived from the renowned multi-volume International Encyclopaedia of Laws, this convenient volume provides comprehensive analysis of the legislation and rules that determine civil procedure and practice in Singapore. Lawyers who handle transnational matters will appreciate the book's clear explanation of distinct terminology and application of rules. The structure follows the classical chapters of a handbook on civil procedure: beginning with the judicial organization of the courts, jurisdiction issues, a discussion of the various actions and claims, and then moving to a review of the proceedings as such. These general chapters are followed by a discussion of the incidents during proceedings, the legal aid and legal costs, and the regulation of evidence. There are chapters on seizure for security and enforcement of judgments, and a final section on alternative dispute resolution. Facts are presented in such a way that readers who are unfamiliar with specific terms and concepts in varying contexts will fully grasp their meaning and significance. Succinct, scholarly, and practical, this book will prove a valuable time-saving tool for business and legal professionals alike. Lawyers representing parties with interests in Singapore will welcome this very useful guide, and academics and researchers will appreciate its comparative value as a contribution to the study of civil procedure in the international context.

Technical Literature

Civil and environmental engineers work together to develop, build, and maintain the man-made and natural environments that make up the infrastructures and ecosystems in which we live and thrive. Civil and Environmental Engineering: Concepts, Methodologies, Tools, and Applications is a comprehensive multi-volume publication showcasing the best research on topics pertaining to road design, building maintenance and construction, transportation, earthquake engineering, waste and pollution management, and water resources management and engineering. Through its broad and extensive coverage on a variety of crucial concepts in the field of civil engineering, and its subfield of environmental engineering, this multi-volume work is an essential addition to the library collections of academic and government institutions and appropriately meets the research needs of engineers, environmental specialists, researchers, and graduate-level students.
