A History of the Future in 100 Objects Princeton University Press

Now a New York Times and USA Today bestseller! Winner of Best Science Fiction in the 2020 Goodreads Choice Awards! *To Sleep in a Sea of Stars* is a brand new epic novel from #1 New York Times bestselling author of *Eragon*, Christopher Paolini. Kira Navárez dreamed of life on new worlds. Now she's awakened a nightmare. During a routine survey mission on an uncolonized planet, Kira finds an alien relic. At first she's delighted, but elation turns to terror when the ancient dust around her begins to move. As war erupts among the stars, Kira is launched into a galaxy-spanning odyssey of discovery and transformation. First contact isn't at all what she imagined, and events push her to the very limits of what it means to be human. While Kira faces her own horrors, Earth and its colonies stand upon the brink of annihilation. Now, Kira might be humanity's greatest and final hope . . . America's Test Kitchen unleashes the potential of what a food processor can do with an eye-opening collection of 75 kitchen-tested recipes to make your cooking easier, faster, and better. Your food processor is a powerful tool but is often relegated to only a handful of tasks. We have always felt the food processor was underutilized and so we've set out to create a book that harnesses this appliance's capabilities as never before, from almost-no-bowl baking to multi-step dishes like stir-fries where all the slicing and chopping happens in the food processor. The result is a book of 75 smart ideas where the food processor is the star of every recipe. It will transform how you use this appliance, streamline everyday cooking and baking, and open doors to projects you would never have considered tackling by hand.

Techniques of the Selling Writer provides solid instruction for people who want to write and sell fiction, not just to talk and study about it. It gives the background, insights, and specific procedures needed by all beginning writers. Here one can learn how to group words into copy that moves, movement into scenes, and scenes into stories; how to develop characters, how to revise and polish, and finally, how to sell the product. No one can teach talent, but the practical skills of the

professional writer's craft can certainly be taught. The correct and imaginative use of these skills can shorten any beginner's apprenticeship by years. This is the book for writers who want to turn rejection slips into cashable checks.

A Plunder of Souls Tor Books

Let the battle for souls begin in *Dead Man's Reach*, the fourth, stand-alone novel in D.B. Jackson's acclaimed *Thieftaker* series. Boston, 1770: The city is a powder keg as tensions between would-be rebels and loyalist torries approach a breaking point and one man is willing to light the match that sets everything off to ensure that he has his revenge. The presence of the British Regulars has made thieftaking a hard business to be in and the jobs that are available are reserved for Sephira Pryce. Ethan Kaille has to resort to taking on jobs that he would otherwise pass up, namely protecting the shops of Torries from Patriot mobs. But, when one British loyalist takes things too far and accidentally kills a young boy, even Ethan reconsiders his line of work. Even more troubling is that instances of violence in the city are increasing, and Ethan often finds himself at the center of the trouble. Once Ethan realizes why he is at the center of all the violence, he finds out that some enemies don't stay buried and will stop at nothing to ruin Ethan's life. Even if that means costing the lives of everyone in Boston, including the people that Ethan loves most. Dark State is the second book in a thrilling series - set in the same world as Charles Stross' *Merchant Princes* series. This book follows *Empire Games*. The time for peace is ending . . . In the near future, one America is experiencing its first technological revolution - whilst in a parallel world, the United States is a hi-tech police state. But both timelines are poised for conflict. Miriam Burgeson's America is heading for civil war. However, a high profile defection might avert this crisis, if only Miriam and her agents can arrange it in time. And Rita Douglas, rival US spy, arrives during this turmoil. Rita's world is rocked when she realizes Miriam is her birth mother, changing her own mission irrevocably. Then her United States discovers yet another parallel earth, and the remains of an advanced society. Something destroyed that civilization, Rita's people are about to rouse it - and two worlds will face the consequences.

THE GLOBAL MONEY SYSTEM NO LONGER WORKS IN OUR BEST INTERESTS; WE NEED A SERIOUS OVERHAUL OF MONEY - AND OF OUR ATTITUDE TOWARDS IT. Based on the four mega-trends of monetary instability, global greying (an ageing global population), the information revolution, and climate change, Bernard Lietaer looks at different scenarios of what the world might be like in 2020. The Corporate Millennium: governments are disbanded, central banks become irrelevant and the world is run with Big Brother control by huge companies with their own currencies. CARING COMMUNITIES: after a monetary crash, people retreat into small, self-sustaining communities, like tribes. HELL ON EARTH: in which the breakdown of life as we know it is followed by a highly individualistic free-for-all, resulting in an ever more obscene gulf between rich and poor. SUSTAINABLE ABUNDANCE: envisages a world where we take better care of the environment, re-engage the poor and the unemployed in mainstream society and give back time and fulfilment to the over-worked, while providing the elderly with a high level of personal care. A society of sustainable abundance is achievable - but only if we are willing to re-think our money system and use money innovations that have already proven effective somewhere in the world today.

The work of Henri Lefebvre - the only major French intellectual of the post-war period to give extensive consideration to the city and urban life - received considerable attention among both academics and practitioners of the built environment following the publication in English of The Production of Space. This new collection brings together, for the first time in English, Lefebvre's reflections on the city and urban life written over a span of some twenty years. The selection of writings is contextualized by an introduction - itself a significant contribution to the interpretation of Henri Lefebvre's work - which places the material within the context of Lefebvre's intellectual and political life and times and raises pertinent issues as to their relevance for contemporary debates over such questions as the nature of urban reality, the production of space and modernity. Writings on Cities is of particular relevance to architects, planners, geographers, and those interested in the philosophical and political understanding of contemporary life.

2105, September: Intelligence Analyst Caine Riordan uncovers a conspiracy on Earth's Moon^{3/4}a history-making clandestine project^{3/4}and ends up involuntarily cryocelled for his troubles. Twelve

years later, Riordan awakens to a changed world. Humanity has achieved faster-than-light travel and is pioneering nearby star systems. And now, Riordan is compelled to become an inadvertent agent of conspiracy himself. Riordan's mission: travel to a newly settled world and investigate whether a primitive local species was once sentient enough so to have built a lost civilization. However, arriving on site in the Delta Pavonis system, Caine discovers that the job he's been given is anything but secret or safe. With assassins and saboteurs dogging his every step, it's clear that someone doesn't want his mission to succeed. In the end, it takes the keen insights of an intelligence analyst and a matching instinct for intrigue to ferret out the truth: that humanity is neither alone in the cosmos nor safe. Earth is revealed to be the lynchpin planet in an impending struggle for interstellar dominance, a struggle into which it is being irresistibly dragged. Discovering new dangers at every turn, Riordan must now convince the powers-that-be that the only way for humanity to survive as a free species is to face the perils directly and to fight fire with fire. From the acclaimed author of *Fine Prey*, *Polymorph*, and *Evolution's Darling* (Philip K. Dick Award special citation and a New York Times Notable Book) comes a sweeping epic, *The Risen Empire*, Scott Westerfeld's dazzling hardcover debut. The undead Emperor has ruled his mighty interstellar empire of eighty human worlds for sixteen hundred years. Because he can grant a form of eternal life, creating an elite known as the Risen, his power has been absolute. He and his sister, the Child Empress, who is eternally a little girl, are worshiped as living gods. No one can touch them. Not until the Rix, machine-augmented humans who worship very different gods: AI compound minds of planetary extent. The Rix are cool, relentless fanatics, and their only goal is to propagate such AIs throughout the galaxy. They seek to end, by any means necessary, the Emperor's prolonged tyranny of one and supplant it with an eternal cybernetic dynasty of their own. They begin by taking the

Child Empress hostage. Captain Laurent Zai of the Imperial Frigate Lynx is tasked with her rescue. Separated by light-years, bound by an unlikely love, Zai and pacifist senator Nara Oxham must each in their own way, face the challenge of the Rix, and they each will hold the fate of the empire in their hands. *The Risen Empire* is the first great space opera of the twenty-first century. Computer Graphics from Scratch demystifies the algorithms used in modern graphics software and guides beginners through building photorealistic 3D renders. Computer graphics programming books are often math-heavy and intimidating for newcomers. Not this one. *Computer Graphics from Scratch* takes a simpler approach by keeping the math to a minimum and focusing on only one aspect of computer graphics, 3D rendering. You'll build two complete, fully functional renderers: a raytracer, which simulates rays of light as they bounce off objects, and a rasterizer, which converts 3D models into 2D pixels. As you progress you'll learn how to create realistic reflections and shadows, and how to render a scene from any point of view. Pseudocode examples throughout make it easy to write your renderers in any language, and links to live JavaScript demos of each algorithm invite you to explore further on your own. Learn how to: Use perspective projection to draw 3D objects on a 2D plane Simulate the way rays of light interact with surfaces Add mirror-like reflections and cast shadows to objects Render a scene from any camera position using clipping planes Use flat, Gouraud, and Phong shading to mimic real surface lighting Paint texture details onto basic shapes to create realistic-looking objects Whether you're an aspiring graphics engineer or a novice programmer curious about how graphics algorithms work, Gabriel Gambetta's simple, clear explanations will quickly put computer graphics concepts and rendering techniques within your reach. All you need is basic coding knowledge and high school math. *Computer Graphics from Scratch* will cover the rest.
