### Twenty-First Century Books

Tundra biomes are known for being frigid, with brief summers and few trees. Despite this harsh environment, tundra biomes are home to many different species of plants and animals. Readers will learn about the highly adapted creatures, such as arctic foxes and musk oxen, living in tundra habitats around the world. Fact boxes provide readers with fun information not covered in the main text, and full-color photographs grab their attention.

Heinemann-Raintree Library

This beginner's guide to tundras explores the unique attributes of this cold habitat, showcasing its beauty and plant and animal diversity. Author and educator Cathryn Sill uses simple, easy-to-understand language to teach children what tundras are, what kinds of animals and plants live there, and how certain species have adapted to the unique

environment. The book covers the characteristics of Arctic, Antarctic, and alpine tundras. John Sill's detailed, realistic paintings reflect the beauty and diversity of the habitat. A glossary and afterword provide more detail for further exploration. Ideal for early childhood and elementary education units on biomes and environments, geography, habitats, and nature.
